Vattenfall to build Clashindarroch II onshore wind farm in UK

Vattenfall has made the final investment decision for the construction of Clashindarroch II onshore windfarm, yet another step in the company's efforts to support the transition to fossil-free energy and contribute to the UK's net-zero ambitions.

Clashindarroch II is located near the town of Huntly in Aberdeenshire, next to Vattenfall's existing Clashindarroch Wind Farm, which has been generating fossil-free electricity for ten years. Clashindarroch II's 14 wind turbines will generate up to 63MW renewable electricity — enough to power around 61,000 UK homes annually¹.

"The UK's onshore wind sector offers an attractive opportunity to accelerate the transition to fossil-free energy, and I'm proud that we're advancing our commitment in this area. Clashindarroch II will contribute to the UK's climate goals while delivering economic value to the region. Through careful environmental planning, the project is also actively supporting biodiversity," says Ulrika Ritzén, Head of Business Unit Onshore Wind at Vattenfall.

The preparatory works for Clashindarroch II will begin in autumn 2025, while construction is expected to begin in spring 2026. First power is anticipated in summer 2027.

About Clashindarroch II wind farm

- Located in Aberdeenshire, Scotland.
- Consists of 14 wind turbines with a capacity of 63 MW
- Preparatory works to begin in autumn 2025 and construction in spring 2026 with first power anticipated in summer 2027.

¹Calculated according to [Renewable UK 'Homes powered equivalent' methodology](#): number of megawatts installed, multiplied by Clash II load factor expressed as a fraction of 1, multiplied by number of hours in a year, divided by average annual domestic electricity consumption expressed in MWh.

Vattenfall is a leading European energy company, which for more than 100 years has electrified industries, supplied energy to people's homes and modernised people's way of living through innovation and collaboration. We work to enable the fossil freedom that drives society forward. We are committed to building a future where everyone can choose fossil free ways to move, make and live. Our goal is net zero emissions in our entire value chain by 2040 at the latest.

We employ approximately 21,000 people, have around 13 million customers and operate mainly in Sweden, Germany, the Netherlands, Denmark and the UK. Vattenfall is fully owned by the Swedish state. For more information: [Fossil freedom - Vattenfall](#)
