Future-proofing for growth

EQT continues to leverage its thematic investment approach and we remained active in a strong market during the third quarter, signing several investments and exits. In addition, we continue to implement future-proofing measures in our portfolio companies and, combining this with strong market conditions, valuations are developing well across all key funds.

We are also taking further steps to future-proof EQT AB. During the third quarter, we accelerated investments into our operating platform to manage our rapid growth. We have implemented a revision of the EQT AB Partner share ownership lock-up structure to proactively address a number of challenging issues which we identified. As part of the revision, we have nearly doubled the IPO lock-up duration for EQT AB Partners. While extending lock-ups to fully expire nine years post EQT’s IPO, Partners were also allowed to sell less than half of the shares which would have been released next year. Fifty percent of the net proceeds from this partial share sale will be reinvested into EQT funds. As a result, we secure stronger client alignment and a better ownership framework, together with a more diversified shareholder base and improved share liquidity. In the period post the share placing, liquidity has been elevated at more than twice the year to date daily volumes (Bloomberg).

In terms of EQT’s fundraising efforts, we continue our good momentum. The recent launch of EQT Future represents a new asset class – a longer-hold fund aimed at driving the sustainable transformation of companies. We will apply our proven active ownership model to attain positive impact at scale alongside attractive risk adjusted returns. Soon, we will complement this with a longer-hold fund focused on infrastructure. In parallel, we are preparing for the next generation of funds, starting with EQT X and Ventures III.

Our impact agenda is closely connected to climate change, and I am proud that EQT has become the first private markets firm to set science based targets. We have formalized our greenhouse gas emission reduction targets in line with the 1.5°C pathway described in the Paris Agreement. EQT has a unique position to take an active role in addressing climate change and we are fully committed to combat it holistically across the EQT ecosystem and all portfolio companies. Setting science based targets is an important milestone towards this goal.

We see potential headwinds for the global economy related to factors such as higher energy prices, rising inflation and higher interest rates, as well as strained supply chains. We also experience strong competition for high-quality assets. However, EQT has an attractive investment pipeline covering all strategies and geographies and a solid platform for continued and sustainable growth.

Definitions

Active funds
Funds currently investing or with not yet realized investments

AUM
Assets Under Management ("AUM") represents the total committed capital from fund investors and net invested capital to which the EQT AB Group is entitled to receive management fees. All of the Group's AUM is fee-generating

Committed capital
The total amounts that fund investors agree to make available to a fund during a specified time period

Commitment period / Investment period
First phase of a fund lifecycle after fundraising, in which most of a fund's committed capital is invested into portfolio companies. Management fees are normally based on committed capital during this period

Current Gross MOIC (Multiple of Invested Capital)
A fund’s Gross MOIC based on the current total value and cost of its underlying investments

Investment level / % Invested
Measures the share of a fund’s total commitments that has been utilized. Calculated as the sum of (i) closed and/or signed investments, including announced public offers, (ii) any earn-outs and/or purchase price adjustments and (iii) less any expected syndication, as a % of a fund’s committed capital

EQT
Where used on its own, is an umbrella term and may refer interchangeably to EQT AB, the EQT AB Group, SEP Holding Group and/or EQT funds, as the context requires

EQT AB Group or the Group
EQT AB and its direct or indirect subsidiaries (for the avoidance of doubt excluding the EQT funds and their portfolio companies)

Exits
Cost amount of realized investments (realized cost) from an EQT fund

Expected Gross MOIC
A fund’s expected Gross MOIC at termination, when a fund is fully realized, based on the estimated total value and cost of its underlying investments upon realization

FTE
The number of full-time equivalent personnel on EQT AB Group’s payroll

FTE+
The number of full-time equivalent personnel and contracted personnel working for EQT AB Group

Fund size
Total committed capital for a specific fund

Gross inflows
New commitments through fundraising activities or increased investments in funds charging fees on net invested capital

Gross fund exits
Value of realized investments (realized value) from an EQT fund. Refers to signed realizations in a given period

Gross MOIC
Total value of investments divided by total cost of investments

Investments
Signed investments by an EQT fund

Key funds
Funds with commitments that represent more than 5% of total commitments in active funds, respectively, as well as EQT Infrastructure II Net invested capital

Net invested capital
Total cost of investments not yet realized (remaining cost). Management fees are generally based on net invested capital after the commitment period / investment period

Post-commitment period / Divestment period
Phase of a fund lifecycle after the commitment period, in which most of a fund’s investments are realized. Management fees are normally based on the net invested capital during the period

Private Capital
Business segment comprised of business lines Private Equity, Ventures, Growth and Public Value

Real Assets
Business segment comprised of business lines Infrastructure and EQT Exeter

Realized value / (Realized cost)
Value (cost) of an investment, or parts of an investment, that at the time has been realized

Remaining value / (Remaining cost)
Value (cost) of an investment, or parts of an investment, currently owned by the EQT funds

Start date
A fund’s start date is the earlier of the first investment or the date when management fees are charged from fund investors

Step-down
Step-downs in AUM generally resulting from the end of the investment period in an existing fund or when a subsequent fund starts to invest. Fees in a specific fund will normally be charged on net invested capital post step-down

Target Gross MOIC
Measure used in fundraising of an EQT fund as a fund’s target level of investment return based on Gross MOIC
