

Avon Protection at SOFIC 2015, 19 - 21 May 2015, stand 1642

Avon Protection, part of Avon Rubber p.l.c, will be demonstrating their range of market leading PPE products, services and project capabilities for military, law enforcement, first responder and commercial markets worldwide.

Avon Protection, part of Avon Rubber p.l.c, will be demonstrating their range of market leading PPE products, services and project capabilities for military, law enforcement, first responder and commercial markets worldwide.

With solutions for land, air and sea operations, Avon's comprehensive range of world class respirators including the market leading and globally acclaimed **FM53 mask** and **ST53 SCBA**, the **Sentinel Rebreather**, and the world's most compact NIOSH certified escape hood - the **NH15** – will be on display.

Building on their position at the forefront of life support systems, diving computer designs, advanced data handling and decompression physiology, **our specialist underwater systems division, AUS, will be launching the new military-standard Dive Computer.**

This next generation dive computer, with real-time data/decompression loggers and a custom interface, is fully reconfigurable allowing remote programming as requirements change, and the multiple algorithm set-up allows for end user decompression system programming.

With high resolution graphics providing enhanced resolution and backlighting for ultra-clear messaging and a long battery life, the new Dive Computer from AUS sets the standard for the military.

"Avon Protection has a fast expanding global customer base across the military, law enforcement and first responder sectors", says Peter Slabbert, Avon's Chief Executive. "We understand the importance of protecting personnel in volatile situations and our world-leading masks are a strong match for the threats these individuals face."

"SOFIC provides the opportunity for global visitors to meet with Avon's CBRN respiratory protection experts and discuss requirements for their personnel. With customers in over 60 countries, Avon has solidly established itself as a leading global brand in CBRN respiratory protection & defence system technology offering innovative Personal Protective Equipment (PPE) products and services across terrestrial, aerospace and marine markets."

About Avon Protection:

Avon Protection is a world leader in CBRN PPE and respiratory protection, providing complete solutions for air, land and sea based personnel in military, law enforcement, first responder, fire-fighting and industrial sectors worldwide.

We have been supplying respirators to the UK Ministry of Defence and other NATO allies since the 1920's.

We are the primary supplier of CBRN personal respiratory equipment to the United States Department of Defense, providing respiratory equipment to the Army, Navy, Marines, Air Force and Special Operations Forces.

Additionally, we are the market leader among LE and SWAT users in the US.
