

**PRESS RELEASE**  
September 2015

## **BeA announces Timber Expo plans**

As businesses across the UK and the wider world prepare for Timber Expo 2015, BeA has confirmed its plans for the leading construction industry event.

At the exhibition - which runs from the 6<sup>th</sup> – 8<sup>th</sup> October at the NEC, Birmingham - the company will use its stand (Stand T3/110) to promote its extensive expertise and capabilities as a global manufacturer of nailing and stapling systems.

In particular, visitors involved in timber frame and off-site construction will be able to learn more about BeA's ability to meet their needs with a complete range of fastening solutions including manual, semi-automated and fully automatic systems.

They'll also be able to discover how BeA products can make a tangible difference to their production efficiencies and their bottom line by saving both time and money.

Already a fastening partner of choice for many leading names across a diverse range of industrial and construction sectors, BeA owes much of its global success to the technical and highly reliable nature of its products. These benefits enable customers to increase the speed and accuracy of fix whilst reducing downtime.

In addition, BeA prides itself on offering sector-leading levels of service and support.

Demonstrating this, the business not only operates a team of field based technical sales experts who adopt a consultative and value adding approach in meeting customer needs, but it also provides access to mobile service engineers.

These individuals are able to carry out on-site servicing and preventative maintenance as well as emergency repairs, helping to keep customers' operations working at full capacity.

Commenting on the company's plans, Simon Carruthers, business development manager at BeA, said: "This is the second year BeA has chosen to exhibit at Timber Expo. Last year's appearance was a great success and we're looking forward to building on that in 2015."

"There's arguably no better place to showcase BeA's continually evolving and highly beneficial offer to the timber and off-site construction industries than at this exhibition, which brings together the latest products, innovations and developments from across the timber sector."
