

Gunnebo Number One in EMEA for Retail Cash Automation

The latest report from independent strategic research and consulting firm, RBR, ranks Gunnebo as the market-leading supplier of automated cash handling solutions to retailers in the EMEA region.

Retail Cash Automation Report 2020 is a global study detailing market sizes and supplier shares for four cash handling terminal types – back-office deposit, back-office recyclers, point-of-sale (POS) acceptors and POS recyclers.

Gunnebo is the only provider producing all four of these solutions in EMEA where it has almost a quarter of the retail cash automation market.

According to RBR this is a market which has been growing globally – up 15% between 2017 and 2019 with nearly 100,000 additional installations.

“We are proud that this study confirms Gunnebo as a leading provider of smart cash management solutions. We continue to deliver great value to retailers, from cash process optimisation and transaction transparency to greater security and a better customer experience,” says Christian Weisser, SVP Cash Management, Gunnebo.

Gunnebo is also well placed to support the rising demand for hygienic cash management solutions. *“Our range of back-office, front-office and full end-to-end solutions reduce the number of touchpoints with cash and maintain the physical distance between shop staff and customers,”* adds Christian Weisser.

About Retail Cash Automation 2020 and RBR

RBR's Retail Cash Automation report 2020 analyses 26 country markets across the Americas, EMEA and Asia-Pacific. As well as calculating market size, it provides in-depth assessments by product, retail sector and vendor. RBR is a strategic research and consulting firm with three decades of experience in banking and retail automation, cards and payments. It assists its clients by providing independent advice and intelligence through published reports, consulting, newsletters and events.

About Cash Management

Cash Management provides automated cash handling solutions, software and services for retailers, banks and CIT companies. We create a more efficient and secure cash cycle and reduce the cost of handling notes and coins across the cash ecosystem. Our offering includes products, software and services for closed cash handling, cash recycling and cash deposit.
