

HTC AND MICROSOFT UNVEIL FIRST SIGNATURE WINDOWS PHONES

New Windows Phone 8X and 8S by HTC to be available through more than 150 mobile operators globally

NEW YORK, 19th September, 2012 — HTC, a global leader in mobile innovation and design, and Microsoft today unveiled the first signature Windows Phones, the stunning Windows® Phone 8X and 8S by HTC®. The smartphones feature the new Windows Phone 8 operating system and boast iconic design, studio-quality sound with Beats Audio™ and incredible camera capabilities.

“Pairing HTC’s beautiful new Windows Phone 8X and 8S with our brand is a big milestone for both companies,” said Steve Ballmer, CEO of Microsoft. “Together we are offering customers a clear choice and a truly unique experience. I’m thrilled to take our longstanding partnership to the next level.”

“We’ve been inspired by Windows Phone 8 to create new smartphones that give the platform the iconic design and personality it deserves,” said Peter Chou, CEO of HTC Corporation. “Windows Phone has clearly emerged as one of the top mobile ecosystems and is competitive against any other smartphone platform in the world.”

Iconic Design

The only phone with Live Tiles, Windows Phone has a clear, differentiated vision and the consumer experience has been widely recognized as being groundbreaking, innovative and fresh. HTC created the Windows Phone 8X and 8S to blend the virtual and the physical utilizing a three dimensional, pure uni-body design based on the Windows Phone Live Tiles. The Windows Phone 8X and 8S by HTC are perfectly sculpted with a dramatic taper making them feel magically thin in your hand.

Because color is such an integral part of the Windows Phone experience, HTC is bringing bold, sophisticated and adventurous colors in a premium matte finish to these devices. The Windows Phone 8X will come in a variety of colors including California Blue, Graphite Black, Flame Red and Limelight Yellow. The Windows Phone 8S by HTC will be available in Domino, Fiesta Red, Atlantic Blue and High-Rise Grey.

Capture and share your world

For the first time, HTC is introducing a 2.1mp, f/2.0 aperture, 88° ultra-wide angle front-facing camera that allows up to four people and more to be captured at once. It also supports 1080p video capture. The rear camera sports an 8mp CMOS sensor with backside-illumination (BSI) for improved low-light performance, along with an f/2.0 aperture, 28mm lens and a dedicated imaging chip. A physical shutter button makes it quick and easy to capture spontaneous action, even if the phone is locked.

Spectacular Sound with Beats Audio

Exclusively available on HTC smartphones, Beats Audio provides authentic, studio-quality sound that delivers the spirit of the original recording. The Windows Phone 8X by HTC featuring Beats Audio also offers a unique audio amplifier powering the 3.5mm audio jack and the speaker, boosting the audio signal for even better sound no matter if you're listening to music, playing a game or watching a video.

Brilliant Display

The Windows Phone 8X by HTC features a beautiful, 4.3" HD-resolution super LCD 2 screen protected from everyday bumps and scrapes by lightweight Gorilla® Glass 2, while optical lamination reduces reflections and glare, ensuring you see every detail. The Windows Phone 8S by HTC boasts a bright super LCD 4" screen with Gorilla® Glass, allowing users to see the Windows Phone Live Tiles, and every message and photo, with crystal clarity and sparkling color.

Entertainment

With the Windows Phone 8X and 8S by HTC people can carry their favorite music, movies and photos with them wherever they go. With the Windows Phone Store and Xbox Live, it is easier than ever to enjoy the latest video, music and games on the move.

Availability

The Windows Phone 8X and 8S by HTC will be available beginning in November. Available through more than 150 carriers in 50+ countries, the Windows Phone 8X or 8S by HTC will be available from the world's top carriers including: **United States:** AT&T, T-Mobile and Verizon Wireless. **Europe:** Orange, O2, MTS, Three UK, T-Mobile, Vodafone, Turkcell and Avea. **Asia-Pacific:** Chunghwa Telecom, Optus, Singapore Telecommunications Group, Smartone, Telstra and Vodafone Australia.
