

Atlas Copco wins construction equipment order in Germany

Stockholm, Sweden, September 23, 2015: Atlas Copco, a leading provider of sustainable productivity solutions, won a major order in Germany for generators and compressors for usage at construction sites. The order value is MEUR 7.1 (MSEK 68).

Boels Rental, a leading European rental business in the construction sector, chose Atlas Copco's Portable Energy division to deliver about 500 generators and portable compressors. The products will be rented to end-users across Europe, serving Boels Rental's expansive customer base within the construction industry. The products will be covered for service by Atlas Copco's Construction Technique Service division.

"We are delighted that Boels Rental continues to show great faith in our products and our local organizations," said Andrew Walker, President of Atlas Copco's Construction Technique business area. *"Partnering with forward-thinking companies such as Boels Rental is paramount to our continued development as a business area, and we look forward to continue helping their construction customers be as productive as possible."*

With this order, Boels Rental will receive a full range of the strongest products for the construction market. For example, the Power QAS generators operate with minimum noise, and the portable air compressors are durable, tough and easy to use.

Headquartered in Sittard, Netherlands, Boels Rental has more than 340 stores across Europe with primary markets being the Netherlands, Belgium, Luxembourg, Germany, Austria, Czech Republic, Poland, Italy and Slovakia.
