TOTAL AOC'S CENTRIK GIVES AVIATION BEAUPORT COMPLETE CONTROL

Total AOC's Centrik management software has revolutionised operations for Aviation Beauport according to Chief Pilot Phil Clarke.

Aviation Beauport originally approached Total AOC with a view to updating and streamlining flight manuals. Clarke says: "I'd heard from others in the industry that Total AOC was extremely quick and efficient, and able to put together a top-class package of manuals within a month."

Clarke was very happy with the manual drafting process, thanks to the clear expertise of the team at Total AOC, who are experienced pilots and have an unparalleled understanding of the challenges facing aviation providers.

Once the manual process was completed, Total AOC introduced Aviation Beauport to its EASA compliant AOC and private operations management solution Centrik.

Designed for use at all levels of a business from the ground engineering crew to the CEO, Centrik completely transforms the operations of aviation providers by providing complete logging and control of everything that happens throughout a company's operations.

Based in the cloud, Centrik can be accessed on any PC, Mac, tablet or smartphone (iPhone and Android), both online and offline.

Clarke says: "I don't know how we would manage without it. The system is incredibly powerful. I get instant feedback on everything that's going on within the company – which pilots have read which notices, all reports which have been filed, everything to do with our safety management system."

Because of the way Centrik is designed, it is also fully customisable. Aviation Beauport will make suggestions to the team at Total AOC, who then deploy updates within 24 hours, no matter how challenging the requirements. "We work very closely with Total AOC and we haven't managed to beat them yet with any requests!" jokes Clarke.

Aviation Beauport provides sophisticated aviation services for business and private customers. With a fleet including a Falcon 2000 LX, Citation XLS and

Mustangs, the firm has a worldwide AOC excluding Australia, operating from a fixed base in Jersey.
