

OrganoClick AB (publ) publishes its interim report for third quarter 2018

"Within the product area biobinders for nonwoven, a globally leading producer of textile interlinings launched an eco-collection in September in which our biobased binder is a key component which replaces the currently used oil based plastic binders. Textile interlinings are used as linings and stiffening materials in all jackets, suits, shirts, etc and are made of nonwovens, woven or knitted textiles which are mechanically modified with binders. Our customer predict to receive their first bigger orders during 2019."
