

OrganoClick's biocomposite OrganoComp® nominated to the award "Biocomposite of the Year 2019"

OrganoClick's biocomposite OrganoComp® is one out of six selected biocomposite materials that has been nominated as "Biocomposite of the Year 2019". The winner will be chosen during the Biocomposites conference in Cologne Nov 14-15 2019, hosted by the Nova Institut.

The Innovation Award "Biocomposite of the Year" highlights products that has entered the market in 2019 or are just about to launch. OrganoComp was chosen, in particular due to the launch in 2019 of the burial coffin Saga made in OrganoComp®. The burial coffin Saga has been developed in collaboration with the Nordics largest coffin producer Fredahl Rydéns. Since the launch in May 2019, Fredahl Rydéns has been marketing and selling the coffin in Sweden while OrganoClick is producing the OrganoComp® material using a proprietary 3D fiber molding technology. OrganoComp® is a 100 % biobased and biodegradable material, made of wood fibers and OrganoClick's biobased binders, utilising waste streams from the food industry such as orange peels, shrimp shells and wheat bran. Due to the strenght of OrganoComp®, the coffin only uses 50 % wood fibers in comparison with a traditional coffin, reducing its weigth from 40 kg to 20 kg and saving valuable trees.

"We are very proud that OrganoComp® has been nominated for this prestigious price. We have been developing the OrganoComp® material and the production technology for nearly ten years and now we finally see several products entering the market. The nomination clearly shows that we have created a unique material and production technology", says Mårten Hellberg, CEO OrganoClick.

About OrganoClick

OrganoClick AB (publ) is a public Swedish cleantech company listed on Nasdaq First North Growth Market. The company develops, produces and markets functional materials based on environmentally friendly fiber chemistry. Examples of products that are marketed by OrganoClick are the durable water repellent technology for textiles OrganoTex®, the biocomposite material OrganoComp®, surface treatment and maintenance products for villa and property owners under the brand BIOkleen®, biobased binder under the trade name OC-BioBinder™ and the flame and rot-resistant timber OrganoWood® (through the joint-venture OrganoWood AB). OrganoClick was founded in 2006 as a commercial spin-off company based on research performed at Stockholm University and the Swedish University of Agricultural Sciences within environmentally friendly fiber chemistry. OrganoClick has won a number of prizes, such as "Sweden's Most Promising Start -up" and "Sweden's Best Environmental Innovation", and has also received a number of awards, such as the WWF "Climate Solver" award, listed as a SUSTAINIA100 company and has also appeared for two years on the Affärsvärldens and NyTekniks list of Sweden's top 33 hottest technology companies. OrganoClick has its head office, production and R&D located in Täby, north of Stockholm. OrganoClick's Certified Adviser on Nasdaq First North Growth Market is Mangold Fondkommission AB, tel: +46 (0)8 503 01 551, email: ca@mangold.se.
