

# Duni group announces the upcoming launch of fossil free premium napkins using OrganoClick's binders

**For more than 10 years, OrganoClick has developed biobased and biodegradable binders that can replace fossil plastic binders in nonwoven and specialty paper. In collaboration with Duni, the leading manufacturer of premium napkins, completely fossil-free and biodegradable premium napkins have been developed for several years. Duni is now announcing its upcoming launch of fossil-free napkins using OrganoClick's bio-based binders.**

OrganoClick's biobased and biodegradable binders have been developed from waste residues in the food industry with biopolymers from orange peel, lemon peel, maize and shrimp shells. In February, OrganoClick announced its first major agreement with an unnamed leading nonwoven manufacturer to begin using OrganoClick's biobased binders. Duni now announces OrganoClick's and Duni's long-standing collaboration in developing fossil-free premium napkins and their upcoming launch.

"We are extremely proud to have developed completely fossil-free premium napkins together with Duni by using OrganoClick's biobased binders. We now look forward to Duni's upcoming launch of the napkins and to continuing to develop the collaboration with Duni for many years ahead," says Mårten Hellberg, CEO of OrganoClick AB.

## **About OrganoClick**

*OrganoClick AB (publ) is a public Swedish cleantech company listed on Nasdaq First North Growth Market. The company develops, produces and markets functional materials based on environmentally friendly fiber chemistry. Examples of products that are marketed by OrganoClick are the durable water repellent technology for textiles OrganoTex®, the biocomposite material OrganoComp®, surface treatment and maintenance products for villa and property owners under the brand BIOkleen®, biobased binder under the trade name OC-BioBinder™ and the flame and rot-resistant timber OrganoWood® (through the joint-venture OrganoWood AB). OrganoClick was founded in 2006 as a commercial spin-off company based on research performed at Stockholm University and the Swedish University of Agricultural Sciences within environmentally friendly fiber chemistry. OrganoClick has won a number of prizes, such as "Sweden's Most Promising Start-up" and "Sweden's Best Environmental Innovation", and has also received a number of awards, such as the WWF "Climate Solver" award, listed as a SUSTAINIA100 company and has also appeared for two years on the Affärsvärldens and NyTekniks list of Sweden's top 33 hottest technology companies. OrganoClick has its head office, production and R&D located in Täby, north of Stockholm. OrganoClick's Certified Adviser on Nasdaq First North Growth Market is Mangold Fondkommission AB, tel: +46 (0)8 503 01 551, email: [ca@mangold.se](mailto:ca@mangold.se).*
