

XXL Sweden new reseller of OrganoTex®

In May, OrganoClick, through its Norwegian distributor Norsk Fjellsport, signed a reseller agreement with XXL Norway for OrganoTex® textile impregnation and shoe care products. The collaboration is now being expanded to also include XXL Sweden's 26 department stores, which will start selling OrganoTex® textile impregnation and detergents for functional clothing, as well as shoe impregnation and shoe wax.

OrganoTex® textile impregnation and shoe care products have been developed for several years and designed to provide good water repellency while being biodegradable. The technology is based on OrganoClick's patented and award-winning technology for modifying textile fibers and is completely free of the problematic perfluorinated substances (PFAS), cyclic siloxanes or isocyanates that are often used in today's textile impregnations. Several of these substances are suspected to be carcinogenic and endocrine disrupting and are extremely long-lived in nature.

“We are very pleased to now expand the collaboration with XXL to also include their Swedish department stores. We now have an even wider distribution in the Nordic region of our PFAS-free and biodegradable impregnation and maintenance products for textile products. It is very gratifying that more and more people are now choosing to work with our biodegradable products that replace PFAS and other environmentally harmful chemical substances,” says Susanne Karlsson, Sales Manager for OrganoTex® at OrganoClick.

The first delivery of products will take place in September 2021, after which XXL Sweden will start selling the products at the beginning of October.

About OrganoClick

OrganoClick AB (publ) is a public Swedish cleantech company listed on Nasdaq First North Growth Market. The company develops, produces and markets functional materials based on environmentally friendly fiber chemistry. Examples of products that are marketed by OrganoClick are the durable water repellent technology for textiles OrganoTex®, the biocomposite material OrganoComp®, surface treatment and maintenance products for villa and property owners under the brand BIOkleen®, biobased binder under the trade name OC-BioBinder™ and the flame and rot-resistant timber OrganoWood® (through the joint-venture OrganoWood AB). OrganoClick was founded in 2006 as a commercial spin-off company based on research performed at Stockholm University and the Swedish University of Agricultural Sciences within environmentally friendly fiber chemistry. OrganoClick has won a number of prizes, such as "Sweden's Most Promising Start-up" and "Sweden's Best Environmental Innovation", and has also received a number of awards, such as the WWF "Climate Solver" award, listed as a SUSTAINIA100 company and has also appeared for two years on the Affärsvärldens and NyTekniks list of Sweden's top 33 hottest technology companies. OrganoClick has its head office, production and R&D located in Täby, north of Stockholm. OrganoClick's Certified Adviser on Nasdaq First North Growth Market is Mangold Fondkommission AB, tel: +46 (0)8 503 01 551, email: ca@mangold.se.
