First day of trading in JS Security

Today is the first day of trading in JS Security Technologies Group AB who are active within blockchain-based cyber security and specializes in data storage and offers security products with blockchain technology as the basic infrastructure.

The company's main product, Delta/NET, is a decentralized data storage network with blockchain as the cornerstone and the main verification and security component. Customers are found in all industries that store some form of data. The company initially operates in Scandinavia with the whole world as its market.

“Today is an exciting day in the history of JS Security. We are very happy that today is the first day of trading on Spotlight Stock Market. Our goal and vision is that every person, government agency or company should own their own information and data and not have to rely on centralisation. From that vision, we have developed a platform, infrastructure and objective where we can offer our customers the possibility of storing information securely and with full transparency. I would also like to take this opportunity to thank our new shareholders for their trust in us as a company.” says Hampus Nyström, CEO, JS Security.

JS Security's new share issue was subscribed to 1292 percent of the offering, and now the company has 497 new shareholders.

“We are happy to welcome JS Security – the eighth company to become listed on Spotlight this year. An exciting company active within cyber security with focus on blockchain-based datastorage. It will be interesting to follow their growth journey” says Carl-Henrik Nordberg, Head of Listing, Spotlight.
