First day of trading in Audientes

Today is the first day of trading in Audientes. The company is a Danish technology company specializing in hearing aids that sells products under the Ven™ by Audientes brand.

Audientes is a Danish technology company that specializes in hearing aids. The company has developed the product Ven™ by Audientes which is currently sold in the Indian market. Audientes intends to add another product to the Company's product portfolio, Companion by Audientes, a situational hearing solution that will initially be introduced in the North American market, followed by additional global markets thereafter. Audientes mission is to help the approximately 500 million people worldwide suffering from disabling hearing loss, who either cannot afford to buy one of the very expensive hearing aids on the market or who cannot get access to conventional hearing aids due to a low density of hearing clinics and audiologists.

"Ringing the bell today at Spotlight Stock Market, marks the beginning of the next phase of Audientes' growth journey, and I am very happy that this day has now come. With this listing on Spotlight, Audientes is now better positioned to further expand and internationalize our investor base. While times are challenging with the current stock market volatility, I see strong confidence in Audientes, our products and our huge growth potential. With our self-fitting hearing aid, Ven™ by Audientes selling in India, and our next product, Companion, soon to be launched in USA and Europe, we are in a prime position to achieve our vision to make quality hearing aids accessible and affordable for everyone who needs them," comments Steen Thygesen, CEO Audientes.

"Today we welcome Audientes who have now completed their list change to Spotlight. An exciting time awaits the company, which will soon add another product to its portfolio and we are excited to see them continue their growth journey as a listed company on Spotlight Stock Market," says Carl-Henrik Nordberg, Head of Listing, Spotlight.
