Getinge publishes Ethics & Compliance Report

To summarize Getinge's activities within the ethics and compliance area, the company is today releasing its first report which describes focus areas in relation to Business Ethics and Responsible Leadership.

At Getinge, responsible leadership means involving all employees to set the standard and acting as role models for ethical behavior and professional integrity. Activities in this area provide the conditions and requirements for Getinge's employees to ensure business is conducted in an ethical and responsible manner. Doing responsible business in all relations, in the company's own organization and in external contexts, is a key part of the company's strategy.

"I am excited about this first Ethics and Compliance report, I am proud of the work that we do and of each and every employee at Getinge who strives to make a difference", says Anna Romberg, Executive Vice President Legal, Compliance & Governance. "Each decision is important and will take us one step closer towards becoming the most trusted and respected company in the MedTech industry".

Getinge has long been dedicated to sustainability, and since 2017 sustainability, together with quality, is a top priority in the company's strategy. This means that ethics, quality and sustainability are integral parts of how the company acts and how it treats its employees, customers and partners.

The report is available on Getinge's website.
