

# Q4 and Full-year 2025

## Financial Report

Comments from Mattias Perjos, CEO

### Organic growth and solid cash flow to end 2025

"We succeeded in growing organically, delivering a record-breaking fourth quarter and organic growth at the upper end of our forecast, 4.9% for the full year. Higher demand for consumables for life supporting ECLS-therapy in the quarter and in Acute Care Therapies contributed to this performance. Sales were also strong in Transplant Care and ventilators. Surgical Workflows continued to strengthen its market-leading position in operating tables and enters 2026 with robust order bookings. In general, sales are more volatile between quarters for Life Science, which grew organically for the full year despite the weaker ending.

Despite headwinds from tariffs (SEK 367 M) and currency effects (SEK 686 M) for the full year 2025 of more than SEK 1 billion compared with last year, we maintained adjusted EBITA margin for the full year in line with 2024 and deliver a solid cash flow. Excluding effects from currency and tariffs, adjusted EBITA margin was 20.3% in the quarter and 16.0% for the full year which is considerably higher than last year. This confirms the positive trend in underlying profitability thanks to our focus on price adjustments, productivity and cost control.

It is gratifying to see that our intensive development efforts have resulted in several important product launches during the quarter. For example Automatic, the next generation of sterile reprocessing automation systems using smart robotics. This system will ultimately lead to safer and more efficient processes. The system is requested by customers and we have already received the first orders. Ambition is to accelerate development efforts of new products over the coming years which will further strengthen our competitiveness. We continued to make good progress in regulatory compliance. Rotaflow consumables in ECLS received EU MDR approval and our iCast covered stent received PMA for two additional versions, which enhances our competitiveness in the US. European deliveries of our intra-aortic balloon pump Cardiosave, which had its CE certificate reinstated in the fall, are expected to start in the second quarter of 2026. We pushed this date due to a delay in shipment of critical components. The order intake for Cardiosave is strong, meaning that there is clear market demand.

We demonstrated during the year that we are well positioned in priority product categories. In addition, stable healthcare needs and the continued willingness of hospitals to invest are creating favorable conditions for our long-term growth. There's currently high geopolitical uncertainty however based on underlying demand, we expect organic sales growth of 3–5% in 2026. Finally, I would like to express my sincere thanks to all our customers and employees for their important efforts during 2025 in creating value for clinical staff and patients."

### October – December 2025 in brief

- Net sales increased organically by 1.2% (9.2) and the order intake rose by 2.3% organically (7.4).
- Adjusted gross profit amounted to SEK 5,037 M (5,604) and the margin was 49.5% (50.6).
- Adjusted EBITA was SEK 1,809 M (2,143) and the margin 17.8% (19.4).
- Adjusted earnings per share amounted to SEK 4.45 (5.28).
- Free cash flow amounted to SEK 1,190 M (1,693).

### January – December 2025 in brief

- Net sales increased organically by 4.9% (4.9) and the order intake rose by 3.5% organically (6.3).
- Adjusted gross profit amounted to SEK 17,607 M (17,409) and the margin was 50.4% (50.1).
- Adjusted EBITA was SEK 4,880 M (4,869) and the margin 14.0% (14.0).
- Adjusted earnings per share amounted to SEK 11.29 (11.73).
- Free cash flow amounted to SEK 2,652 M (3,284).
- A dividend per share of SEK 4.75 (4.60) is proposed.

**Outlook 2026:** Net sales for 2026 are expected to increase by 3–5% organically, adjusted for the phase-out of Surgical Perfusion<sup>1)</sup>

### Summary of financial performance<sup>2)</sup>

1) For more information about the adjustment of the Organic change key ratio, refer to Other information on page 9.

2) See page 3 for calculations of adjusted performance measures.

Every care has been taken in the translation of this Financial Report. In the event of discrepancies, the Swedish original will supersede the English translation.

- The organic order intake for Acute Care Therapies increased, mainly due to double-digit growth in ECLS consumables and Transplant Care. EVH in Cardiovascular Surgery and intra-aortic balloon pumps in Cardiac Assist also contributed.
- Life Science's organic order intake declined in the quarter, mainly due to a weak performance in WIS and Bio-Processing in EMEA and APAC.
- The organic order intake for Surgical Workflows increased following a solid performance in Infection Control and Surgical Workplaces.
- Geographically, the organic order intake trend was positive in both EMEA and Americas. APAC declined, mainly due to a higher order intake in China last year.

- Acute Care Therapies increased its net sales organically, mainly due to the continued strong performance in ventilators, Transplant Care and ECLS therapy.
- Life Science's organic net sales declined, primarily in Bio-Processing and WIS and despite strong growth in Sterile Transfer.
- In Surgical Workflows, organic net sales rose due to growth in operating tables in Surgical Workplaces and consumables in Infection Control.
- Positive organic growth in Americas and EMEA, including strong performances in Germany and Italy. Sales fell in APAC, particularly in China, which nevertheless reported growth for the full-year 2025.
- Recurring revenues increased in the quarter on the back of strong sales of, for example, consumables in ECLS therapy, Sterile Transfer and Transplant Care. Sales of capital goods declined in the quarter, mainly due to WIS and timing effects.

- Net sales declined by SEK 886 M, corresponding to -8.0%.
- Exchange rates had an impact of SEK -1,023M on sales, corresponding to -9.2%.
- Successful efforts with price adjustments and volumes had an impact of SEK +138 M on sales, corresponding to +1.2%.

## Group performance

1) Consumables, service and spare parts

### Net sales – bridge between Q4 2024 and Q4 2025

- Net sales declined by SEK 886 M, corresponding to -8.0%.
- Exchange rates had an impact of SEK -1,023M on sales, corresponding to -9.2%.
- Successful efforts with price adjustments and volumes had an impact of SEK +138 M on sales, corresponding to +1.2%.

## Earnings trend

- Currency effects impacted adjusted gross profit by SEK -573 M and adjusted EBITA by SEK -316 M compared with last year.
- The gross margin declined, mainly due to tariff costs and negative currency effects.
- Adjusted EBITA fell by SEK 334 M, of which tariff costs had an impact of SEK -148 M compared with last year. Despite a favorable mix and continued successful price adjustments, the margin declined 1.6 percentage points.
- Acquisition and restructuring costs are primarily related to the ongoing rationalizations in the organization. Other items affecting comparability primarily comprised higher additional purchase prices related to Paragonix's strong performance in 2025 and write-down of research and development projects in Surgical Workflows.
- Net financial items amounted to SEK -164 M, mainly as a result of lower average interest year-on-year.
- The tax rate for the full-year was 27.6%.

## Adjusted EBITA per business area<sup>1)</sup>

- Adjusted EBITA for Acute Care Therapies declined by SEK 168 M, largely due to negative currency and tariff effects despite price adjustments, volume and a favorable product mix. The margin fell by 1.3 percentage points.
- Adjusted EBITA for Life Science fell by SEK 121 M, mainly due to lower gross profit. The margin declined by 6.6 percentage points.
- Surgical Workflows' adjusted EBITA fell by SEK 46 M, following lower gross profit. The margin was unchanged.
- Costs in Group functions and other were largely unchanged year-on-year.

	Oct-Dec 2025	Oct-Dec 2024	Jan-Dec 2025	Jan-Dec 2024
<b>SEK M</b>				
<b>Acute Care Therapies</b>	<b>1,140</b>	<b>1,308</b>	<b>3,763</b>	<b>3,554</b>
Margin, %	22.4	23.7	20.2	19.8

Margin, %	16.5	16.5	9.1	8.9
Group functions and other (incl. eliminations)	-127	-128	-450	-383
<b>Total</b>	<b>1,809</b>	<b>2,143</b>	<b>4,880</b>	<b>4,869</b>
Margin, %	17.8	19.4	14.0	14.0

1) See Note 4 Depreciation, amortization and write-downs and Note 6 Adjustment items for other items affecting comparability.

## Adjusted EBITA – bridge between Q4 2024 and Q4 2025

- Adjusted operating expenses for selling and administration increased organically by 0.8%, mainly due to higher sales activities. Inorganically, these expenses fell by 7.6%.
- The year-on-year difference for other operating income and expenses was mainly attributable to currency effects related to operating receivables and liabilities in foreign currency.

- Exchange-rate fluctuations, meaning translation and transaction effects, impacted adjusted gross profit by SEK -573 M compared with last year, of which SEK -393 M in translation effects and SEK -180 M in transaction effects and hedging outcome.
- The change in adjusted EBITA attributable to currency effects was SEK -316 M, of which SEK -105 M arose from translation effects and SEK -211 M from the net of transaction effects, hedging outcome, and revaluation of operating receivables and liabilities in foreign currency.

- Compared with last year, free cash flow was negatively impacted by changes in working capital, mainly due to changes in inventories and accounts payable.
- The financial position remains solid, and net interest-bearing debt is lower compared to last year.

- Costs for R&D were 7.8% lower year-on-year.
- Capitalized development costs were 7.5% lower compared with last year.
- The year-on-year difference was mainly due to lower costs for quality-related efforts.
- Amortization and write-down of capitalized development costs amounted to SEK -132 M (-414), of which SEK -45 M (-309) in write-downs.

## Adjusted operating expenses

(excluding depreciation, amortization and write-downs and other items affecting comparability)<sup>1)</sup>

1) Capitalized development projects

- During the year Getinge has carried out energy efficiency measures and emission-reduction initiatives which has resulted in a reduction of CO2 emissions, primarily due to a higher share of renewable electricity and gas.
- In the Q4-report full-year figures have been added for the recently acquired manufacturing companies Ultra Clean, Healthmark and Quadralene. This resulted in an increase in the Group's total CO2 emissions, energy consumption and water consumption which is also reflected in historical data for 2021-2024. The additional effect for 2025 amounts to 5,979 MWh and 1,209 tons of CO2.
- Water consumption is mainly related to facilities management and testing in production of washers and sterilizers and varies over time depending on production volume. The outcome showed a rising trend due to a higher degree of testing in production and increase in water for facilities at one of our sites.
- It was discovered in the reporting process that data for water consumption had been incorrectly reported. The error related to a manufacturing company and has been corrected by approximately 4,600 m3 for 2025. Action has been taken to reduce the risk of errors occurring in the future.
- The employee engagement index remained stable at 73 out of 100 points and reflected a positive trend in engagement.
- The KPI of Work Related Accident Rate (WRAR) showed a positive trend and Getinge fulfills the target of WRAR <1 2025. Accidents reported are similar between the years, mainly related to ergonomics.
- The regulatory compliance KPI improved compared with the full-year 2024 since the first quarters of 2024 included a higher number of audit findings per audit.
- Regarding online customer training, Respiratory Week was organized in October and resulted in a higher number of webinars, which has a positive impact on the full-year KPI.
- From 2026, Getinge will track a new KPI in business ethics regarding the percentage of employees who have completed training in the Code of Conduct.

## Sustainability developments

This interim report reflects Getinge's double materiality assessment and is based on the ESRS structure to present the company's impact, risks and opportunities from a social, environmental and governance perspective. The aim is to continuously work to minimize the negative impact on people and the environment and to generate sustainable value for customers, employees and other stakeholders.

1) Index Jan-Dec 2025/Jan-Dec 2024

2) Eight manufacturing sites were in the scope of the 2024 Sustainability Report. A more detailed investigation has revealed that one of these sites was outside the area of water stress defined as "high" and "extremely high" by the WRI Water Risk Atlas tool Aqueduct. Accordingly, this site is no longer included in the reporting. The annual and quarterly figures have been adjusted and will also be updated retroactively in the 2025 Sustainability Report.

3) Measured and updated every six months

4) Amount at end of period

5) Data was recalculated in 2024. See Getinge's 2024 Sustainability Report for more details

## Acute Care Therapies

Acute Care Therapies offers world-leading solutions for life support in acute health conditions. The offering includes solutions for cardiovascular procedures, efficient handling of organs for transplantation and a broad selection of products and therapies for intensive care.

- The organic order intake for Acute Care Therapies increased, mainly due to double-digit growth in ECLS consumables and Transplant Care. EVH in Cardiovascular Surgery and intra-aortic balloon pumps in Cardiac Assist also contributed.
- Geographically, the organic order intake increased in all regions, except for APAC, where China and Japan declined compared with last year.

- Acute Care Therapies increased its net sales organically, mainly due to the continued strong performance in ventilators, Transplant Care and ECLS therapy.
- Sales grew organically, particularly in Americas, following a solid performance in ECLS therapy and stents among others. EMEA also increased while APAC fell slightly.
- Recurring revenue noted a strong organic performance, with contributions from both consumables and service. Sales of capital goods decreased organically.

- The adjusted gross margin declined by 0.3 percentage points, largely due to negative currency and tariff effects.
- Adjusted selling and administrative expenses increased organically by 5.1%, mainly as a result of higher sales activities. Inorganically, these expenses fell by 4.3%.
- Adjusted EBITA declined by SEK 168 M, largely due to negative currency and tariff effects despite price adjustments, volume and a favorable product mix. The margin fell by 1.3 percentage points.
- Currency effects impacted sales by SEK -572 M, adjusted gross profit by SEK -356 M and adjusted EBITA by SEK -202 M compared with last year.

### Order intake and net sales

### Events in the business area in the quarter

- Premarket Approval (PMA) received for the iCast covered stent in large diameter (12 mm) and lengths of 32 mm and for 10 mm × 59 mm lengths.
- CE certificate received under the EU MDR for the PLS set used in extracorporeal circulation for cardiac and/or pulmonary support.
- PiCCO, our minimally invasive hemodynamic monitoring system, is now included in the European Society of Intensive Care Medicine's Guideline on Circulatory Shock.
- The 510(k)-submission for the intra-aortic balloon pump, Cardiosave, has been pushed to the second quarter of 2026 due to a delay in shipment of critical components. The order intake for Cardiosave is strong, meaning that there is clear market demand.

## Life Science

Life Science offers a comprehensive range of equipment, technical expertise and consultation to prevent contamination in pharmaceutical and medical device production and with the aim to strengthen integrity of results in biomedical research.

- Life Science's organic order intake declined in the quarter, mainly due to a weak performance in WIS and Bio-Processing in EMEA and APAC. Services performed positively.
- The organic order intake declined in all regions and mainly in EMEA, where Italy and Germany experienced a challenging quarter.

- Life Science's organic net sales declined, primarily in Bio-Processing and WIS despite strong growth in Sterile Transfer.
- Organic sales increased in EMEA mainly due to healthy growth in Sterile Transfer and isolators. The decline in Americas and APAC was mainly due to WIS.
- The trend in recurring revenue was favorable, driven by continued strong growth in Sterile Transfer and service. Capital goods declined primarily in WIS and Bio-Processing.

- The adjusted gross margin declined by 6.1 percentage points, mainly due to volume, currencies and tariffs.
- Adjusted selling and administrative expenses declined organically by -11.2% due to lower personnel related costs and a continued focus on productivity. Inorganically, these expenses fell by -17.7%.
- Adjusted EBITA fell by SEK 121 M, mainly due to lower gross profit. The margin declined by 6.6 percentage points.
- Currency effects impacted sales by SEK -114 M, adjusted gross profit by SEK -58 M and adjusted EBITA by SEK -47 M compared with last year.

### Events in the business area in the quarter

- Siemens' SIMATIC WinCC Unified system, which is industry standard, is integrated into the new generation of cGMP washers and sterilizers, delivering an open and flexible interface that supports streamlined operations, efficient data management, and secured data integrity. The interface simplifies procurement, validation and reduces training needs, addressing digitalization challenges in the pharmaceutical industry.

## Surgical Workflows

*Surgical Workflows offers products and solutions to serve as an end-to-end partner for optimizing the quality, safety and capacity usage of the sterile supply departments and operating rooms.*

- The organic order intake for Surgical Workflows increased following a solid performance in Infection Control and Surgical Workplaces.
- Growth was positive in all regions and particularly strong in North America and APAC, with China and Japan representing the main contributors.

- In Surgical Workflows, organic net sales rose due to growth in operating tables in Surgical Workplaces and consumables in Infection Control.
- Geographically, EMEA reported growth in all product categories. The volatile sales profile in Digital Health Solutions contributed to the decline in APAC.
- Growth in both recurring revenue and capital goods in the quarter.

- The adjusted gross margin declined by 0.5 percentage points, mainly due to negative currency effects, tariffs and inflation.
- Adjusted selling and administrative expenses declined organically by 0.8% as a result of the continued focus on productivity. Inorganically, these expenses fell by 9.0%.
- Adjusted EBITA fell by SEK 46 M, following lower gross profit. The margin was unchanged.
- Currency effects impacted sales by SEK -338 M, adjusted gross profit by SEK -159 M and adjusted EBITA by SEK -69 M compared with last year.

### Events in the business area in the quarter

- Launch of the utility-efficient Aquadis 44 washer-disinfector, which helps hospitals reduce costs and meet environmental targets.
- Launch of Automatiq, the new family of next generation automated solutions that combines smart robotics, intelligent conveyor systems and advanced software to achieve safer, more consistent and less labor-intensive sterile reprocessing.

## Other information

### Events after the end of the reporting period

Geopolitical debate and the turbulent global environment continue to dominate the market. We are monitoring developments closely and continuously assessing the potential impact on our operations.

### Seasonal variations

Getinge's sales and earnings are affected by seasonal variations. The highest net sales are usually generated in the fourth quarter, followed by the second, third and first quarters. The shares of sales derived from capital goods and recurring revenue also normally changes during the year, with a higher share of sales of capital goods toward the end of the year.

### Transactions with related parties

Getinge carried out normal commercial transactions with companies in the Carl Bennet AB sphere, which comprised the sale and purchase of goods and services. In addition, no other significant transactions with related parties occurred during the period other than transactions with subsidiaries.

### Forward-looking information

This report contains forward-looking information based on the current expectations of company management. Although management deems that the expectations presented by such forward-looking information are reasonable, no guarantee can be given that these expectations will prove correct. Accordingly, the actual future outcome could vary considerably compared with what is stated in the forward-looking information, due to such factors as changed conditions regarding finances, market and competition, changes in legal and regulatory requirements and other political measures, and fluctuations in exchange rates.

### Update of Organic change key ratio

The definition of Organic change has been adjusted from the first quarter of 2026 to also exclude phase-outs of product categories. The change has been made to provide a more fair presentation of underlying growth even when phase-outs are currently being made. Quarterly comparative figures for 2025, excluding the Surgical Perfusion product category, are published on Getinge's website under Reports and Presentations,

<https://www.getinge.com/int/company/investors/reports-presentations/>.

Surgical Perfusion's sales in 2026 are expected to decline from approximately SEK 250 M to SEK 50 M.

### Getinge's financial targets 2024–2028 and dividend policy

- Average adjusted earnings per share growth: >12%\*
- Getinge's dividend policy is to pay dividends of 30-50% of net profit to shareholders.

### Getinge's sustainability targets

#### Environment

- Reduce Scope 1 and 2 emissions by 90% by 2030\*\*
- Reduce Scope 3 emissions by 25% by 2030, and by 90% by 2050\*\*
- Reduce energy consumption in production by 20% by 2030\*\*
- Reduce water consumption in sites located in water scarce areas by 20% by 2030\*\*
- No waste to landfill by 2030, excluding material required by local regulations to be landfilled

#### Social

- Employee engagement: >70%

- Reduce work-related accidents in relation to working hours (Work Related Accident Rate, WRAR) to less than 1 by 2025
- Ensure equal employment opportunity and non-discrimination across all levels of the organization Follow-up % female vs male managers and employees
- Quality regulatory compliance, audit results/inspection: <1.5 deviation

#### Governance

- All employees are properly trained in Business ethics

*\*Base year 2023*

*\*\*Base year 2021*

#### Dividend

The Board of Directors and CEO propose a dividend for 2025 of SEK 4.75 (4.60) per share, a combined total of SEK 1,294 M (1,253). The Board's dividend proposal for 2025 is a deviation from the policy of paying dividends of 30–50% of net profit. The proposal is based on the favorable cash flow generated by the operations. The final date for trading including the right to receive dividends is April 21, 2026 and the proposed record date is April 23, 2026. Euroclear expects to distribute the dividend to shareholders on April 28, 2026.

#### 2026 Annual General Meeting

Getinge AB's Annual General Meeting will be held on April 21, 2026 in Halmstad, Sweden. Shareholders wishing to have a matter addressed at the Annual General Meeting can submit their proposal to Getinge's Board Chairman by e-mail: [arenden.bolagsstamma@getinge.com](mailto:arenden.bolagsstamma@getinge.com), or by mail at the following address: Getinge AB, Att: Bolagsstämmoärenden, Box 8861, SE-402 72 Gothenburg, Sweden. To ensure inclusion in the notice and the agenda of the AGM, proposals must be received by the company not later than March 3, 2026.

# Risk management

## External risks

	Description	Potential consequences	Management
<b>External shocks, such as geopolitical risks, natural disasters, terrorism, pandemics, etc.</b>	Rapidly emerging situations, which could affect large geographical areas, a single country, a region or a specific facility.	The primary risk of such events is that employees could be injured. In addition, operations can be disrupted, which could have a negative impact on sales and earnings. Price increases for customers is another scenario.	Active business intelligence can identify some of these risks at an early stage, which enables the Group to adapt to the changed circumstances. The Group is working actively on continuity risks. This also includes scenarios based on external shocks as part of Getinge's proactive risk management. Getinge conducts operations in Russia in accordance with international sanctions and regulations via a small sales company. The activities in the country are currently limited to fulfilling existing customer commitments. However, the circumstances for conducting operations in the country have gradually deteriorated. Getinge does not conduct any manufacturing operations in either Russia or Ukraine and has no major suppliers in these countries. When Russia invaded Ukraine in 2022, the Group's sales in Russia and Ukraine represented less than 1% of the Group's total net sales and equity. Despite the limited direct impact that the invasion has had on Getinge's operations in Russia and Ukraine, the Russian invasion of Ukraine may nevertheless have a negative impact on the development of the Group's earnings and position. However, it is difficult at the current time to assess the future consequences of the conflict and its impact on the Group.  Getinge is monitoring and actively adapting its operations based on escalating developments during 2025 regarding geopolitical friction and higher trade barriers, such as tariffs and increased volatility in currency markets. As a consequence, a potentially higher risk premium in the capital markets cannot be ruled out. The Group addresses this through a solid capital-raising process and a clear overview of its goods flows, and thereby also the impact of tariffs and other trade barriers. Getinge has a geographically diversified purchasing and production strategy which partly can help to mitigate any negative consequences.
<b>Interruptions in supply chains / dependence on external suppliers</b>	Critical components manufactured by external suppliers are a vital part of Getinge's production chain. Serious production disruptions may arise if these components are not supplied on schedule.	As a consequence, vital equipment may not be delivered to customers, which may make it difficult or impossible to provide necessary healthcare.	Getinge can state that there is a risk of temporary business interruptions, for example, due to supply constraints for key components such as semiconductors, as a result of the uncertain global security situation. Getinge actively monitors critical suppliers, starting as early as when the partnership is established and continuing with routine evaluations. The Purchasing organization has tools for assessing risk and receives regular training in this area. The Group also works on ensuring that it has adequate levels of critical components in stock, in its own operations or with the relevant supplier. Interruptions of critical deliveries are managed as an important part of activities related to business continuity risks. See "Business interruptions."
<b>Risks related to healthcare reimbursement systems</b>	Political decisions can change the conditions for healthcare through changed reimbursement models for healthcare providers.	Changes to reimbursement systems could have significant effects on specific markets, with budget cuts or deferred funding potentially impacting the operations.	Although it is difficult to influence this risk directly, since decisions are outside the Group's control, it is mitigated by the presence in a large number of markets, which reduces the overall impact of individual changes.
<b>New competitors and new technologies</b>	Certain markets and product segments have niche players who offer solutions outside customary market behavior.	These competitors could capture market shares from established companies, including Getinge, which could result in lower sales and earnings.	Through continuous innovative development and market analysis, Getinge strives to be at the forefront, identify potential competitors and adapt to technological changes. The industry is also considered to have high barriers to entry since medical devices are subject to extensive regulatory requirements.
<b>Increased expectations and new laws and regulations related to sustainability</b>	The sustainability requirements and expectations placed on Getinge as a company are changing, and the scope is increasing rapidly.	Getinge's failure to meet the ever-more stringent environmental, social and governance requirements could have negative consequences on the company's reputation, operations and financial earnings. It may also impact the company's ability to recruit and retain competent staff, and risk disqualifying the company from participating in tenders with specific requirements.	By engaging with stakeholders and improving its materiality assessment and ERM process, Getinge increases its understanding of the expectations placed on the company. It is also beneficial that the company has adopted the focus areas that are to be prioritized moving forward. In addition, the company has developed its sustainability framework, focusing on the products and solutions placed on the market to ensure quality and corporate responsibility. This also leads to employee engagement. The company reports annually on its performance in sustainability in a transparent manner and is making preparations ahead of the forthcoming CSRD.
<b>Increasing competition for public funds</b>	Reduced public budgets for investing in medical devices impacts the total market potential.	Increased competition for limited public funds may lead to reduced funding for medical device investments, which in turn negatively impacts Getinge's sales figures.	Getinge works actively to offer solutions that improve the efficiency of healthcare, which is believed to generate healthy demand even where budgets are constrained.

## Operational risks

	Description	Potential consequences	Management
<b>Quality risks from a regulatory perspective</b>	A large part of Getinge's product range is subject to strict legislation requiring extensive assessments, quality controls and detailed documentation.	It cannot be ruled out that Getinge's operations, financial position and earnings may be negatively impacted in the future if the company is unable to comply with regulatory requirements or if these requirements change.	To limit these risks, Getinge conducts extensive quality and regulatory activities. The Quality Compliance, Regulatory & Medical Affairs function has a representative in the Getinge Executive Team and also on the management teams of each business area, and in all R&D and production units. In addition, Getinge's sales force and service technicians receive quality and regulatory training every other year, and then have their certification renewed, which is a requirement for representing the company. Getinge conducts extensive research and development to ensure that the product portfolio meets all existing and future quality and regulatory requirements. The majority of the production facilities have ISO 13485 and/or ISO 9001 certification. In summary, Getinge invests significant resources in quality and regulatory matters, which is a top priority of the Group's strategy. As previously reported in the first quarter of 2023, the notifying body TÜV SÜD decided to temporarily suspend the CE certificate for Getinge's HLS and PLS sets for ECLS therapy and for Getinge's intra-aortic balloon pumps. As a result, the company initiated corrective actions to regain CE certification for these products. At the end of September 2024, TÜV SÜD reinstated Getinge's CE certificate for HLS and PLS sets, with certain conditions. The temporary suspension of Getinge's Cardiosave Intra-Aortic Balloon Pump, effective from March 2024, was extended until July 1, 2025. At the beginning of August 2025, TÜV SÜD reinstated Getinge's CE mark for Cardiosave under certain conditions which Getinge has promised to fulfill. On May 8, 2024, the FDA sent a letter to healthcare providers in the US. The letter does not refer to any new field actions, but healthcare providers are encouraged to move from using Getinge's Cardiosave, Cardiohelp and HLS sets to alternative products and to continue to use Getinge's products only if no other options are available. As a result of the FDA's letter, Getinge has decided to suspend marketing activities for the relevant products in the US until outstanding actions related to quality improvements have been taken and approved. Sales of these products are restricted to customers who do not have any other alternatives. On November 15, 2024, the FDA published a Letter to Health Care Providers on its website, reminding them of the voluntary medical device removal and supply concerns related to all of Getinge's VasoView Hemopro Endoscopic Vessel Harvesting (EVH) Systems. Actions are being taken as agreed with the FDA.
<b>Product quality from a customer perspective</b>	In certain cases, Getinge's products do not meet customer expectations.	Product quality shortcomings could lead to customer seeking out alternative suppliers, which in turn could negatively impact sales and profitability over time.	Getinge applies a far-reaching quality process to ensure a high and even level of quality, which is an ongoing process that results in continuous improvements. When quality fails, it is important to rapidly rectify the fault during the first service visit. Getinge closely monitors the "first-time fix" factor of its services operations and works actively to make improvements.
<b>Product liability risks</b>	Healthcare suppliers run a risk, like other players in the healthcare industry, of being subject to product liability and other legal claims.	Such claims can involve large amounts and significant legal expenses. Getinge carries the customary indemnity and product liability insurances, but there is a risk that this insurance coverage may not fully cover product liability and other claims.	The most important way of managing these risks is the extensive quality-related and regulatory activities performed by the Group. Sources of potential future claims for damages are monitored through active incident reporting. Corrective and protective action (CAPA) is initiated when necessary to investigate the underlying cause, after which the product design may be corrected to remedy the fault. The settlement process regarding the Multidistrict Litigation (MDL) for surgical mesh implants, which Getinge announced previously, has been completed and payment of the majority of the settlement amount was made in the first quarter of 2023. The settlement is not an admission of liability or wrongdoing by the company. Getinge will continue to defend against any litigation that cannot be resolved under the final agreement. Costs for such processes are not expected to be material.
<b>Information and data security</b>	Leaks of confidential information or hacking into the Group's IT system resulting in restricted availability or interruptions of business-critical systems. In this context, extortion or sabotage cannot be excluded either.	Hacking into IT systems could lead to business interruptions. A loss of sensitive information may adversely affect confidence in the company. Leaks of personal data could lead to high fines.	Getinge has global IT services that ensure efficiency, coordination and security. Getinge's IT structure in production is largely decentralized, which reduces the consequences of certain cyber risks by spreading the risks across different systems. Getinge has centralized identity management and conducts extensive surveillance and monitoring of the central infrastructure to quickly detect and counteract security threats via its security operations center (SOC). Getinge regularly trains all employees to reduce cyber risks based on human factors.
<b>Deficiencies in cybersecurity</b>	Security deficiencies in the Group's digital offering, such as connected machines at customer sites and stricter legal requirements for processing personal data. In this context, extortion or sabotage cannot be excluded either.	Restricted availability of equipment delivered by Getinge to its customers, which could result in interruptions to the hospital operations and it not being possible to offer patients sufficient care in critical situations.	Getinge works diligently and systematically, following a risk-based approach, to ensure the integrity of its connected equipment. By continuously evaluating and prioritizing security risks, we can effectively protect both our systems and our customers' data. Comprehensive access testing is carried out before these solutions are offered to the Group's customers so as to identify and rectify potential vulnerabilities.
<b>Business interruptions</b>	Unforeseen events, such as natural disasters or fires, etc. can cause disruptions to production or the supply chain.	Such events may result in costly or delayed deliveries or non-delivery of products to Getinge's customers, which may adversely affect the Group's earnings.	Getinge takes continuous preventive action to ensure a high level of availability and delivery reliability, including regular inspections of the production facilities with the help of external expertise.
<b>Non-compliance with laws and regulations mainly on business ethics</b>	Breaches of laws and regulations related to, for example, competition, anti-corruption, AI, cyber security, data protection or trade restrictions.	Breaches of these regulations could lead to fines, sanctions and have a negative impact on the Getinge brand.	Getinge has previously provided information about ongoing investigations and agreements with the authorities regarding anti-competitive procedures in the sale of medical devices in Brazil. The process with the Brazilian federal authority, Comptroller General of the Union (CGU), is still ongoing. During the third quarter of 2024, Getinge made, in line with applicable accounting standards, a provision of SEK 482 M related to anticipated costs related to this process. The provision is the result of an ongoing constructive dialogue to reach a conclusion in the negotiations with the CGU. The final and definitive costs will be determined once the negotiations have been concluded, and such an amount could be lower or higher than the provision that has now been made. No information emerged in the period that would cause a change in the provision.

**Dependence on meeting climate targets**

Getinge is dependent on meeting the climate targets set to reach net zero emissions by 2050 that were approved by the SBTi. Getinge's analysis shows that the majority of emissions come from the purchases of goods, logistics and the use of sold products. As a result, the company does not have full control over its emissions and cannot therefore directly control their reduction.

If Getinge does not meet its climate targets, it could have a significant negative impact on the company's reputation and operations, in addition to negative climate impacts.

In addition to the investigations with CGU, Getinge has previously communicated that settlement agreements have been reached with the Brazilian Federal Prosecutor's Office (Ministério Público Federal) in 2018 and the competition authority, Administrative Council for Economic Defense (CADE) in 2019, both related to anti-competitive practices relating to the sale of medical devices. It cannot be ruled out that any further agreements with authorities may have a material impact on the company's financial earnings and position, but cannot currently be estimated neither in terms of amount nor timing. Getinge has a zero tolerance policy when it comes to contraventions of these regulations. The Group's Code of Conduct is very clear in this respect. The EVP Sustainability, Legal & Compliance represents the Ethics & Compliance function on the Getinge Executive Team, which highlights the high priority of these issues. A training program in business ethics is provided on an ongoing basis and the aim is for all employees to undergo such training at least once a year. The regulations also apply to external distributors who sell Getinge products.

Getinge is dependent on meeting the climate targets set to reach net zero emissions by 2050 that were approved by the SBTi. Getinge's analysis shows that the majority of emissions come from the purchases of goods, logistics and the use of sold products. As a result, the company does not have full control over its emissions and cannot therefore directly control their reduction.

## Strategic risks

	Description	Potential consequences	Management
<b>Lack of future skills</b>	Risk of dependency on key people including lack of succession planning and ineffective processes to identify and spread critical know-how within the organization. Also the risk of being unable to attract and retain the right talent and skills.	A lack of future skills could lead to higher staff turnover, operational disruptions and damage the Getinge brand. In the future, it may have a negative impact on Getinge's long-term sustainability and growth, and ultimately affect Getinge's ability to attract and retain talent.	Getinge is continuously improving the succession planning process to ensure the global development of talent. Getinge is focusing on talent mobility and knowledge sharing and strives to create a culture and leadership that attracts both new and existing talent. Getinge's aim is to be a company where everyone can thrive and grow.
<b>Digitization and innovation</b>	Getinge's future growth depends on successful product development, particularly in digitalization. Innovation is crucial for maintaining and strengthening the company's leading position.	Innovation efforts are costly and it is not possible to guarantee that developed products will be commercially successful, which could result in impairment. In the long term, the Group's market position could be negatively affected if Getinge is unsuccessful in this area.	As a means of maximizing the return on investments in research and development, the Group applies a structured selection and planning process that includes careful analyses of the market, technological progress, choice of production method and selection of subcontractors. The actual development work is also conducted in a structured manner and each project undergoes a number of fixed controls. Getinge is particularly concerned with ensuring access to the right skills, retaining key individuals, being an attractive employer to recruit talent externally, and identifying and developing talent within the organization.
<b>Fragmented product portfolio</b>	Getinge's product portfolio consists, to a certain extent, of a large number of acquisitions that were made throughout the years within a variety of product categories.	An offering to our customers that, in certain parts, is too diverse could lead to Getinge lacking the critical mass needed to conduct fully efficient operations in all product categories.	Efforts are being made to enhance the efficiency of the customer offering under the framework of the ongoing strategic activities in each business area. The introduction of the new EU Medical Device Regulation means priorities need to be made regarding the certification of products under the new regulatory framework. Products have been selected that, over the long term, will be a part of the customer offering, which will lead to increased concentration as well as streamlining.
<b>Risks related to intellectual property rights</b>	Getinge's leading positions in many product segments are based on patent and trademark rights, which could lead to disputes with competitors.	Costly disputes over intellectual property rights could reduce the return on investment in research and development. It cannot be ruled out that the costs that could arise associated with this could be material.	Getinge closely monitors the activities of its competitors and actively defends its intellectual property rights through legal processes if necessary.
<b>Financial risks</b>	Getinge is exposed to a number of financial risks in its operations. Financial risks principally pertain to currency risks, interest-rate risks, and credit and counterparty risks.	Fluctuations in exchange rates and interest rates and changes in counterparties' credit profiles could adversely affect the Group's income statement and balance sheet.	Risk management is regulated by the finance policy adopted by the Board and a Treasury directive decided by the Getinge Executive Team based on the finance policy. The ultimate responsibility for managing the Group's financial risks and developing methods and principles of financial risk management lies with the Getinge Executive Team and the treasury function. For more detailed information concerning these risks, refer to Note 18 of the Annual Report.
<b>Profitability dependent on certain products and markets</b>	Some products and markets contribute more to overall profitability.	If sales volumes in these markets were to decrease, it could have a negative impact on the Group's profitability.	Getinge works actively to monitor profitability per product and market in order to ensure profitability over time. To reduce the sensitivity of profitability, the Group actively works on ensuring that it has the right cost level in relation to the current price levels in the market. Getinge also works actively to establish itself in new markets.
<b>Transferring the product portfolio</b>	Long lead times in research and development due to comprehensive regulations and long validation processes are hampering rapid development to more sustainable product and packaging solutions. The medical device market is strictly regulated, partly to ensure patient safety, which can affect how quickly Getinge's products can become sustainable.	If it is not possible to transfer Getinge's product and packaging solutions to more sustainable solutions quickly enough, there is a risk that Getinge's reputation and competitiveness could decline.	Getinge will always prioritize patient safety and follow applicable regulations. Without impacting our fundamental approach, the company has expanded the implementation of eco-design principles into its development process and has begun to carry out life cycle assessments of its product and packaging solutions to ensure that advances can be made when the opportunity arises.

## Assurance

The Board of Directors and CEO assure that the interim report provides a true and fair review of the Parent Company and the Group's operations, position and earnings and describes the material risks and uncertainties faced by the Parent Company and the Group.

1) The provision for field actions for Cardiosave had an impact of SEK 297 M and negotiations with CGU in Brazil had an impact of SEK 482 M in 2024.

2) Excluding write-downs on non-current assets

3) Non-cash financial items were reclassified to operating liabilities for the 2024 comparative figures.

4) Of which interest paid and received in the quarter amounted to SEK -119 M (-138) and other financial items to SEK -8 M (-4). Accumulated, interest paid and received amounted to SEK -490 M (-517) and other financial items to SEK -26 M (-25).

## Note 1 Accounting policies

The Group's interim report has been prepared in accordance with IAS 34 Interim Financial Reporting and the Swedish Annual Accounts Act. For the Parent Company, the report has been prepared in accordance with the Swedish Annual Accounts Act and RFR 2. The accounting policies adopted are consistent with those applied for the 2024 Annual Report and should be read in conjunction with that Annual Report.

For practical reasons, the figures in this interim report have not been rounded off, which is why notes and tables may not total correct amounts. Unless otherwise specified, all figures pertain to SEK M and figures in parentheses pertain to the year-earlier period. The interim report provides alternative performance measures for monitoring the Group's operations.

Number of employees			11,670	11,791

1) Before and after dilution

## Alternative performance measures

Alternative performance measures refer to financial measures used by the company's management and investors to evaluate the Group's earnings and financial position and that cannot be directly read or derived from the financial statements. These financial measures are intended to facilitate analysis of the Group's performance. Accordingly, the alternative performance measures should be considered a supplement to the financial statements prepared in accordance with IFRS. The financial measures recognized in this report may differ from similar measures used by other companies.

<b>Net sales, adjusted for currency impact</b>	<b>11,209</b>	<b>37,185</b>	
<b>Adjusted EBITA-margin, adjusted for currency impact and tariff cost, %</b>	<b>20.3</b>	<b>16.0</b>	

## Note 9 Acquisitions

### Acquisitions in 2025

Net assets acquired, SEK M	2025	2024
Intangible assets	-	3,241
Tangible assets	-	23
Deferred tax assets	-	25
Inventories	-	93
Accounts receivable	-	142
Other current receivables	-	8
Cash and cash equivalents	-	115
Deferred tax liabilities	-	-755
Accounts payable	-	-32
Other non-interest-bearing liabilities	-	-57
<b>Identifiable net assets</b>	<b>-</b>	<b>2,802</b>
Goodwill	-	3,103
<b>Total purchase prices</b>	<b>-</b>	<b>5,905</b>
Deductible and additional items		
Additional purchase prices and other adjustments	1,580	290
Acquisition of shares from non-controlling interests	83	31
Unpaid purchase prices	-	-2,855
Cash and cash equivalents in acquired businesses	-	-115
<b>Impact on the Group's cash and cash equivalents</b>	<b>1,663</b>	<b>3,256</b>

In September 2024, 100% of the shares in Paragonix Technologies, Inc. were acquired. Additional purchase prices of SEK 1,555 M were paid in 2025 for the achievement of performance-related and regulatory milestones. In addition, the acquisition balance sheet was adjusted, which resulted in a reduced purchase price of SEK 19 M. Additional purchase prices of SEK 44 M were paid for Irasun GmbH in 2025. Shares were also acquired from non-controlling interests in the subsidiary Pulsion Medical Systems SE, after which the Getinge Group owns all of the shares in the company. The acquisition price amounted to SEK 83 M and the transaction was recognized in equity.

#### Contingent considerations

Getinge signed agreements on contingent considerations in connection with acquisitions of assets and subsidiaries. Liabilities for these additional purchase prices are measured at fair value through profit or loss at Level 3 of the fair value hierarchy. The additional purchase prices are contingent on securing government approval for the acquired product development projects and contingent on the earnings performance of the acquired businesses. Future cash flows are discounted if the planned payment date exceeds 12 months. Assessments of future cash flows related to the contingent consideration are regularly reviewed by company management and recognized at fair value. The discount effect is recognized in profit or loss under financial items on an ongoing basis.

In 2025, Paragonix Technologies, Inc. exceeded the performance-related milestones recognized in connection with the acquisition and an additional non-interest-bearing liability of SEK 179 M related to contingent consideration was recognized in the fourth quarter of 2025. Getinge Aseptic Solutions was also acquired in 2024, and updated assessments have resulted in the dissolution in the fourth quarter of SEK 55 M of the contingent consideration that was recognized in connection with the acquisition.

	December 31 2025	December 31 2024
<b>Contingent considerations</b>		
<b>Opening balance</b>	<b>3,280</b>	<b>498</b>

## Definitions

### Financial terms

**Adjusted earnings per share:** Adjusted net profit for the period attributable to Parent Company shareholders in relation to average number of shares.

**Adjusted EBIT:** Operating profit (EBIT) with add-back of acquisition and restructuring costs and other items affecting comparability.

**Adjusted EBITA:** EBITA with add-back of acquisition and restructuring costs and other items affecting comparability.

**Adjusted EBITDA:** EBITDA with add-back of acquisition and restructuring costs and other items affecting comparability.

**Adjusted gross profit:** Gross profit with add-back of depreciation, amortization and write-downs and other items affecting comparability.

**Adjusted net profit for the period:** Net profit for the period with add-back of amortization and write-down of acquired intangible assets, acquisition and restructuring costs, other items affecting comparability and tax effect of add-back of income-statement items.

**Adjusted profit before tax:** Profit before tax for the period with add-back of amortization and write-down of acquired intangible assets, acquisition and restructuring costs and other items affecting comparability.

**Capital employed:** Average total assets with add-back of cash and cash equivalents, other provisions, accounts payable and other non-interest-bearing liabilities.

**Capital goods:** Durable products that are not consumed when used.

**Currency transaction effect:** Exchange of current year's volumes of foreign currency at this year's exchange rates, compared with the exchange rates in the preceding year.

**Earnings per share:** Net profit attributable to Parent Company shareholders in relation to average number of shares.

**EBIT:** Operating profit.

**EBITA margin:** EBITA in relation to net sales.

**EBITA:** Operating profit (EBIT) before add-back of amortization and write-down of acquired intangible assets.

**EBITDA margin:** EBITDA in relation to net sales.

**EBITDA:** Operating profit (EBIT) with add-back of amortization, depreciation and write-downs.

**Equity per share:** Equity in relation to the number of shares at the end of the period.

**Equity/assets ratio:** Equity in relation to total assets.

**Free cash flow:** Cash flow from operating activities and investing activities, excluding acquisitions and divestment of operations.

**Gross margin:** Gross profit in relation to net sales.

**Interest-coverage ratio:** Rolling 12 months' adjusted EBITDA in relation to rolling 12 months' net interest.

**Items affecting comparability:** Acquisition and restructuring costs and other items affecting comparability. Other items affecting comparability are significant revenue/expenses that impact comparability between accounting periods. These items include, but are not limited to, write-downs, disputes and major gains and losses attributable to divestments of assets or businesses.

**Net debt/equity ratio:** Net interest-bearing debt in relation to equity.

**Operating liabilities:** Accounts payable, other provisions and other non-interest-bearing liabilities (contract liabilities, non-interest-bearing provisions for pensions and similar obligations, accrued expenses and deferred income as well as other liabilities).

**Operating margin:** Operating profit (EBIT) in relation to net sales.

**Operating receivables:** Accounts receivable and other current receivables (contract assets, prepaid expenses and accrued income, and other receivables).

**Organic change:** A financial change adjusted for currency, acquisitions and divestments of operations.

**Adjusted to the following from first quarter of 2026:**

A financial change adjusted for currency, acquisitions and divestments of operations and phase-out of product categories.

**Recurring revenue:** Revenue from sales of products that are continuously consumed as well as service, spare parts and similar items.

**Return on capital employed:** Rolling 12 months' adjusted EBIT in relation to capital employed.

**Return on equity:** Rolling 12 months' profit after tax in relation to average equity.

### Sustainability terms

**Double materiality assessment:** The process of identifying an organization's impacts on people and the environment and the sustainability-related financial risks

and opportunities for the organization. The results are also used to determine whether a sustainability topic is to be included in the company's sustainability report.

**Employee engagement:** The engagement score in Getinge's employee survey.

**ESRS:** European Sustainability Reporting Standards.

**Online customer training:** The number of training courses held for customers. The total number of times a customer has completed an e-learning course or participated in a training webinar.

**REC (Renewable Energy Certificates):** Used to certify that electricity was generated from renewable sources.

**Scope 1 & 2:** Carbon emissions from production (in ton CO<sub>2</sub> equivalents). Scope 1 includes emissions from oil and gas consumption. Emissions from Getinge's vehicle fleet are excluded in the interim report but the amounts for the full-year are presented in the Sustainability Report. Scope 2 includes emissions from electricity, heating and cooling. Emissions from leased premises are excluded in the interim report but the amounts for the full-year are presented in the Sustainability Report.

**Scope 3:** Includes other indirect emissions, both upstream and downstream in the value chain, arising from activities such as freight transport, purchased goods and services, as well as emissions from the use of products sold.

**WRAR (Work Related Accident Rate):** The number of work related accidents divided by the number of hours worked, normalized by multiplying by 200,000 hours.

### Medical terms

**Cardiopulmonary:** Pertaining to or belonging to both heart and lung.

**Cardiovascular:** Pertaining to or belonging to both heart and blood vessels.

**DPTE®-BetaBags:** Bag that ensures contamination-free transfer of components.

**ECMO:** Extracorporeal membrane oxygenation, meaning oxygenation outside the body through a membrane. Put simply, a modified cardiac and respiratory machine that exchanges oxygen and carbon dioxide, like an artificial lung.

**Endoscope:** Equipment for visual examination of the body's cavities, such as the stomach.

**Endovascular:** Vascular treatment using catheter technologies.

**EVH** Endoscopic Vessel Harvesting is a minimally invasive technique for removing blood vessels, for example during coronary artery bypass surgery.

**Extracorporeal life support (ECLS):** Oxygenation of the patient's blood outside the body (extracorporeal) using advanced medical technology.

**Grafts:** Artificial vascular implants.

**Hemodynamic monitoring:** Monitoring the balance between blood pressure and blood flow.

**Low temperature sterilization:** A device used to sterilize surgical instruments which cannot be sterilized with high temperature steam. It is mainly used for instruments

used in the minimal invasive and robotic surgery.

**NAVA:** Neurally Adjusted Ventilatory Assist (NAVA) identifies the electric activity that activates the diaphragm and using these signals adapts the ventilation to the patient's respiratory rhythm.

**Perfusionist:** A healthcare professional who operates the heart-lung machine during surgery.

**Stent:** A tube for endovascular widening of blood vessels.

**Sterilizer:** A device to eliminate microorganisms on surgical instruments, usually by high temperature with steam.

**Vascular intervention:** A medical procedure conducted through vascular puncturing instead of using an open surgery method.

**Ventilator:** Medical device to help patients breath.

**Vessel harvesting:** The name of the process for removing blood vessels from the body.

**WIS:** The product category of washers, isolators and sterilizers.

## Geographic areas

**Americas:** North, South and Central America.

**APAC:** Asia and Pacific (excluding Middle East).

**EMEA:** Europe, Middle East and Africa.
