

## Clavister Appoints Nils Undén Vice President of Engineering

*Örnsköldsvik, Sweden, February 27, 2020.* Clavister, a leader in high-performance cybersecurity solutions, announces today the appointment of Nils Undén for the role of Vice President of Engineering.

Undén's wide experience and industry knowledge is expected to help Clavister take the next transformative step in its engineering processes, product deliveries and the overall culture of innovation. "This is a very exciting appointment for our company that prides itself on great solutions and products that protect our customers. Nils has tried-and-true ways of working with software development that will surely help us succeed in the marketplace; I'm very pleased he's accepted this role and will drive our strategy into the heart of product offering," says President and CEO John Vestberg.

Since 1993 when he began taking on engineering management roles, Undén's career has been defined by helping tech companies navigate their operating terrain to find the right products and strategies to succeed. Be that large international product organisations like IBM, telecom solution providers or start-ups across CRM, logistics or fintech, his first priority is to build compelling solutions with true customer value. Undén has a professional drive—based in an analytical and data driven approach—to guide software development teams to deliver innovative and rich solutions.

"When I was approached by Clavister to consider the role of VP of Engineering, I took a deep look into their organization, their processes and their overall strategy. What I saw was an innovator, a company that has been building excellent products and superior technologies; a company waiting to break loose and make their place as a leading European cybersecurity vendor. To be part of that journey is a very exciting prospect and I can't wait to lend my talents and passions to their goals," declares Undén.
