

Clavister Receives 11 MSEK Order for Its NetShield Firewall Product

Ömsköldsvik, Sweden, 2 October 2020. Clavister, a leader in high performance cybersecurity solutions, has received an order for its Clavister NetShield Firewall product worth 11 MSEK from security provider ContentKeeper.

ContentKeeper, headquartered in Canberra, Australia and with U.S. operations based in Anaheim, California, provides web security solutions for global enterprises, educational institutions and government agencies.

As part of ContentKeeper's new 3rd Generation cloud security service being deployed in Dallas, Los Angeles and Canberra, Clavister's carrier-grade firewall product, Clavister NetShield, is integrated as a first line of defence protecting mission-critical Cloud customers.

"After a period of technical validation and integration work, we are happy to see that our product was chosen to be used in this very demanding environment, both from a security standpoint and from capacity and performance requirements. We appreciate ContentKeeper's technical partnership and diligent process in building new cloud security services where we now are part of those services," comments John Vestberg, President and CEO of Clavister.

"We are delighted to be expanding our 3rd Generation Cloud service incorporating the high performance, carrier-grade firewall technology leveraging our technology partnership with Clavister," concludes Mark Riley, Chief Technology Officer at ContentKeeper.
