Skanska refurbishes laboratory facilities in Helsinki, Finland, for EUR 28M, about SEK 300M

Skanska has signed a contract with Helsinki University Properties LTD for a refurbishment project in Helsinki, Finland. The contract is worth EUR 28M, about SEK 300M, which will be included in the Nordic order bookings for the first quarter of 2026.

The project involves the delivery of new laboratory facilities for the B and C wings of a building originally completed in 1966. The primary refurbishment needs relate to modernizing the building services, which will be upgraded to meet current standards. In addition, a new air-handling unit room will be constructed for the property. The total gross floor area of the project is approximately 9,000 square meters. The facility will be designated for use by the HUS Diagnostic Center.

Construction is scheduled to begin in the first quarter of 2026 and is expected to be completed during 2028.
