Skanska signs lease agreement for new Norwegian headquarters in Oslo, Norway

Skanska has signed a ten-year lease agreement for approximately 7,500 square meters of office space in Christian Krohgs gate 2, which is a new office project developed by Skanska and Entra in a 50/50 joint venture, in Oslo, Norway. With this lease the building is now 35 percent leased. Skanska is expected to take occupancy of its new Norwegian headquarters in the fourth quarter of 2029.

Christian Krohgs gate 2 is situated in Vaterland which is one of the most central areas in Oslo. The existing property will be completely refurbished and expanded in the coming years. Following redevelopment, the property will offer 21,200 square meters with modern and flexible office space in a building with a touch of Oslo industrial history. The location is close to the Central Station with strong public transport connections.

The project has high climate and environmental ambitions, including a target of BREEAM-NOR v6.0 Very Good, fossil-free construction site and a significant reduction of greenhouse gas emissions from materials compared to a reference building. The partners are also working to achieve low waste volumes, a high degree of reuse and energy solutions that can lift the building to energy class A.
