Skanska signs additional contract for data center in Virginia, USA, for USD 94M about SEK 870M

Skanska has signed a contract with an existing client to build a data center in Virginia, USA. The contract is worth USD 94M, about SEK 870M, which will be included in the US order bookings for the second quarter of 2026.

Work is for a new building within an existing campus and includes construction of a single-story 17,700 square meter (190,000 SF) data center, to include four colocation data halls and administrative space, full electrical, mechanical, civil, telecom, and security systems. The work includes interior fit-out and associated site/utility work, for a designed capacity of 38.4 MW.

Work will begin in October 2026 and is scheduled for completion in the second quarter of 2028.
