

Storetec receives multiple award nominations for the Document Manager Magazine Awards.

Hull based, Storetec Services Ltd, specialise in outsourced document scanning services and have been chosen as finalists in this year's Document Manager Magazine Awards for three different categories, including: Company of the Year, BPO/Outsourcing/Bureau Business of the Year and Service/Support Company of the Year.

Storetec has grown to become one of the largest outsourced document scanning providers in the UK. From the beginning Storetec seized upon emerging technologies and its own determination to provide intuitive, fast and secure outsourced document management services, utilising the advantage of evolving web technologies. This has catapulted Storetec into a supplier league that does business with some of the largest companies in the world.

The Document Manager Magazine Awards take place annually and recognise a variety of disciplines. They reward companies and products in the Document, Records and Content Management, Imaging and Capture Industry and are decided on by a public vote. The awards will be presented at a ceremony on the 23rd October at the Hotel Russell in London's Russell Square. The winners will be those who have made a significant impact with the public and readers of Document Manager Magazine

Storetec are proud to have received the nominations. David Wilkinson, Sales Director, says:

"This is the 3rd year running we've been named as a finalist for the Document Manager Magazine Awards. After winning the award for Outsourcing/Bureau Business of the Year in 2013, we hope to repeat last year's success in this category. To also be chosen as finalists for Service/Support Company of the Year and overall Company of the Year is a huge honour. I'm particularly delighted for our staff. It's their hard work and dedication in providing our clients with a brilliant experience that has been recognised by these nominations."
