Advenica strengthens cooperation with FMV

The Swedish Defence Materiel Administration (FMV) has placed an order for technical studies on solutions for protected communication. The order value amounts to approximately SEK 1.7 million and delivery will take place in the fall of 2017.

Since 2002 Advenica has developed encryption solutions for the Swedish National Defence. In addition to new developments, Advenica has conducted system maintenance, business intelligence and various types of technical studies commissioned by FMV. The order that now has been placed is an extension of an existing order.

> *After having worked for more than a decade with FMV, Advenica now has a strong position as a provider of cybersecurity for the Swedish authorities relying on FMV's procurement responsibilities. Through development in close cooperation with the client comes both a deep understanding of their needs and a long-term, trusting relationship. We appreciate being selected to be part of this new mission and we look forward to contributing with our knowledge.*
