

A Swedish authority chooses Advenica's cybersecurity solutions in a new project

A Swedish authority has chosen Advenica's innovative technology to protect their flow of information. The order is on Advenica's latest solution ZoneGuard and the order value is approximately SEK 800,000.

ZoneGuard ensures that only information defined by the organisation in question may pass. The solution enables different IT systems to be linked together in spite of different security classifications and to exchange information securely.

By enabling secure information exchange, ZoneGuard provides benefits such as improved workflows, eliminated manual interaction and opens up for collaboration and innovation. The order will be delivered this fall.

Today's sophisticated IT crimes require businesses to think differently and start focusing on what kind of information they want to take part of and pass through their networks, instead of only keeping the known harmful information out. This is a significant order for Advenica because it is a new project and we are proud that they have chosen our solutions to secure their flow of information.

Einar Lindquist, CEO, Advenica AB
