

Advenica signs one of the most significant orders so far in Finland – worth approximately MSEK 2.5

Advenica, a leading European provider of cybersecurity solutions and services, has achieved new success on the international market. The order placed on crypto products is from a new customer within the Finnish public sector.

Advenica established offices in Helsinki late 2016, and the market responded quickly. Over the last four months the company has welcomed four new important customers in completely different lines of business.

The latest agreement includes crypto products delivered in the third quarter of 2017 and support services over three years. The order value is approximately MSEK 2.5, which makes it one of the largest so far in Finland.

“The Finnish market offers great potential. This order confirms yet again Advenica as a leading and trusted provider of high assurance solutions, but also the importance of local presence. Our sales force here has grown, and our new sales engineer was instrumental to landing this new customer.”

Mikael Puska, CEO, Advenica Oy
