

Advenica extends agreement with a Swedish authority – new order worth 3 MSEK

The Swedish provider of cybersecurity solutions signs an extended agreement with an existing customer to include additional accessories for previously installed hardware encryption.

The order placed is worth MSEK 3 with delivery scheduled during the first quarter of 2018. The customer, a larger Swedish governmental agency, is an established customer to whom Advenica previously has supplied similar equipment. The new order supplements the existing installations of Advenica's hardware encryption.

Advenica's encryption products protect information at the highest security level for the Swedish armed forced. They are also approved for encrypted communication at the highest security level within the EU.

The nature and circumstances of the industry regarding the delivery and the customer means that further information about the customer will not be published.

Strengthening existing bonds is equally as important to us as developing new ones. We are very pleased about growing with this particular customer.

Einar Lindquist, CEO Advenica AB
