

Finnish MSEK 2.5 order on Advenica's cybersecurity

An organisation in the Finnish governmental sector turns to Advenica to provide high assurance cybersecurity solutions.

Advenica continues its stable growth in Finland. Since establishing offices in Helsinki late 2016, multiple Finnish customers within the public sector have chosen the European provider's certified encryption and segmentation products.

The current order is placed by a governmental agency on products and a managed service agreement worth approximately MSEK 2.5, with delivery during Q2/2018.

The market has responded very positively to Advenica's presence in Finland, and we are getting more and more attention. This new order proves yet again that there is a concrete need for our unique high assurance solutions to safeguard critical data. We are proud to contribute to upgrading cybersecurity within the governmental sector.

Mikael Puska, CEO, Advenica Oy

The nature and circumstances of the industry regarding the delivery and the customer means that further information about the customer will not be published.
