

Advenica receives order worth MSEK 5.7 from Finnish customer

Advenica, a leading European provider of cybersecurity solutions, has received a new order for high assurance cybersecurity solutions from a customer working closely with the Finnish National security.

With digitalisation more devices are connected to the Internet – convenient, but this also increases the possible attack routes into the IT structure. Going without digital communication is hardly an option, and the only way to avoid falling victim to these attacks is to work with cybersecurity in a consistent and structured way. This is why multiple Finnish customers within the public sector already have chosen the European provider's certified encryption and segmentation products.

The new order, worth MSEK 5.7, is placed by a customer working closely with the Finnish National Security. The order concerns Advenica's Cross Domain Solution products as well as services. Delivery is planned to Q4 2019. The nature and circumstances of the industry regarding the delivery and the customer means that further information about the end customer will not be published.

We see a clearly growing demand for cybersecurity solutions that meet different organization's high demands for information security – and our unique high assurance cybersecurity solutions is exactly what these customers need.

Mikael Puska, CEO, Advenica Oy
