

Advenica receives new order for data diodes, worth SEK 1.7 million, from Swedish authority

Advenica, the Swedish supplier of cybersecurity solutions, has received a new order for data diodes from a Swedish authority. The deal is worth MSEK 1.7 and the delivery will start immediately.

Preventing intrusion and information leaks while maintaining the integrity and confidentiality of the network, all in order to protect critical assets, is something that companies in both the defense industry and critical infrastructure need.

Advenica is a well-established and trusted supplier of cybersecurity solutions both in Sweden and internationally and can offer high-assurance products that meet exactly these requirements - Advenica's data diodes - SecuriCDS Data Diode.

A Swedish authority has now placed an order for data diodes including services. The customer has also previously chosen Advenica as a supplier of cybersecurity solutions and has now re-selected Advenica's products, now for a new project. Delivery of the new order will start immediately.

The nature of the industry and the circumstances regarding the delivery and the customer means that further information about the end customer will not be published.

We work with clients whose operations require solutions to secure the most valuable information, customers who have high security requirements. Through our products, networks can be physically isolated at the same time as information can be securely connected. We are proud that Swedish authorities choose us as the supplier of effective cybersecurity solutions - solutions that, by protecting critical information, contribute to a safer world.

Marie Bengtsson, CEO
