

Press release

myFC continues to integrate their fuel cells into the leading smartphones, power banks and mobile phone battery case

Stockholm, 29th of November 2016

Swedish myFC has integrated their fuel cell into another batch of smart phones, power banks and a mobile phone case. Today's briefing comes after yesterday's announcement that the company is the first in the world to show an iPhone 7 and a Samsung Galaxy S7 with a fully functional and entirely integrated fuel cell.

myFC's integrated fuel cell, here in the iPhone 7, LG G5, Xiaomi Mi5, Huawei Nexus 6P, HTC 10, Samsung Galaxy S7, Mophie Juice Pack, GP Powerbank, and Anker PowerCore+.

There is no integration cooperation with these external brands or companies named or shown in the photos in this press release. All rights reserved.

myFC presents their integrated fuel cell in the following products:

Smartphones:

HTC 10
LG G5
Huawei Nexus 6P
Xiaomi Mi5

Power banks:

GP Powerbank
Anker PowerCore+

Mobile phone case:

Mophie Juice Pack

- What we are showing is that our fuel cell technology has come so far that it offers a real solution to the battery problem we see all over the world. We show that the JAQ technology has an incredible range of applications and possibilities. We illustrate that the integration of our fuel cells and fuel in consumer electronics that run on batteries is possible. In this way, users get the best from both worlds - everything batteries and fuel cells can offer – without having to make compromises, says Björn Westerholm, CEO of myFC

The integrated smartphones, power banks, and mobile phone battery case in the photograph of this press release is powered by myFC's PowerCard based on water and salt. They do not require cables, external charging nor access to an electrical outlet to charge the phone. The only thing one needs is a JAQ PowerCard from myFC.

The business model will be based on the licensing of myFC's fuel cell technology.

About myFC

myFC is a Swedish innovation company that develops energy solutions using fuel cell technology. The company has launched several portable fuel cell chargers for small electronics such as cell phones, cameras and tablets. Fuel cells use environmentally friendly technology that enables instant charging from a depleted battery state without needing a wall charge. myFC was founded in 2005, has its head office in Stockholm and was listed on the NASDAQ First North in May 2014. The company's Certified Advisor is Remium Nordic AB. To learn more, please visit www.myfcpower.com
