MyFC showcases fuel cell charger JAQ Hybrid at Mobile World Congress 2018

Stockholm, February 26, 2017

Swedish fuel cell company myFC attends Mobile World Congress in Barcelona with its JAQ Hybrid, the world's smallest fuel cell charger for smartphones and tablets.

"A year ago, we launched the world's smallest fuel cell, LAMINA. Now we're proud to showcase our first commercial product on the LAMINA platform, JAQ Hybrid. There is literally no other product like it in the world," says Björn Westerholm, CEO of myFC.

JAQ Hybrid is the world's smallest fuel cell charger, able to both produce and store energy thanks to the coexistence of battery and fuel cell. It can be charged using myFC's patented, green fuel, based on salt and water, as well as through a regular power outlet. Its promise is infinite power in your pocket, ending the experience of depleted smartphone batteries.

About myFC

MyFC, a Swedish innovation company and market leader in micro fuel cells, develops green energy solutions. Its JAQ Hybrid platform, which co-locates fuel cell and battery to charge smartphones and tablets, was launched in 2017. JAQ Hybrid is the company's third hydrogen-powered product following JAQ and PowerTrek. It runs on the company's patented fuel consisting of salt, water and reactants. MyFC was founded in 2005 and is part of the group myFC Holding AB. MyFC Holding was listed on NASDAQ | First North in May 2014. Its head office is located in Stockholm and the company's Certified Advisor is Avanza Bank. For more information, visit www.myfcpower.com
