## myFC Debuts World's Smallest Portable Fuel Cell Charger at Mobile World Congress

**myFC's new fuel cell charger, "JAQ," is smaller, lighter, more powerful, and considerably cheaper**

**Barcelona, February 27th 2015** – Swedish innovation company myFC will premiere a new fuel cell charger, "JAQ," at the Mobile World Congress. The new charger is a powerhouse – smaller, lighter, at a lower cost per charge, and a hefty improvement in capacity. The slimline card, which consists of ordinary water and salt and easily fits in a pocket or bag, represents a new way of charging. Users can easily charge mobile phones and tablets using the card, which lasts for one smartphone charge. No pre-charging in a power socket is needed as electricity is created instantly on the spot when the card is activated. The new charger debuts at the Mobile World Congress (booth 7F41, hall 7) and will be in stores in Q4 2015.

"Mobile accessibility is critical for everyone and the demand for charging solutions for mobile phones, tablets, and cameras is increasing," says Björn Westerholm, CEO of myFC AB. "The dramatic reduction of the size of both the fuel and charger allows for the charger to be slimmer, so as to nicely fit inside a jacket pocket, for example. This truly makes energy available whenever you need it."

Fuel cells use environmentally friendly technology to generate their own electricity, which can be used to charge one's mobile phone, tablet, or camera completely independent of a power outlet or sunlight.

**About myFC**

myFC is a Swedish innovation company that develops energy solutions using fuel cell technology. The company has launched two portable fuel cell chargers for small electronics like cell phones, cameras and tablets. Fuel cells use environmentally friendly technology that enables instant charging from a depleted battery state without ever needing a wall charge. myFC was founded in 2005, has its head office in Stockholm and was listed on the NASDAQ OMX First North in May 2014. The company's Certified Advisor is Remium Nordic AB. To find out more, please visit [www.myfcpower.com](http://www.myfcpower.com)
