

Our vision is to make green energy instantly available,
everywhere for everyone

Press release

myFC and 3 Sweden sign an exclusive cooperation contract

Stockholm October 1, 2015

Swedish myFC and the telecommunications network operator 3 take the next step in their cooperation, signing an exclusive agreement pertaining to myFC's world-leading fuel cell mobile charging technology.

3 Sweden has become the first operator in the world to be able to offer myFC's fuel cell charger JAQ to their customers. It is planned to be on sale by 3 at the end of Q4 of 2015.

"Our customers surf more than anyone else in the world and now we are the first operator who can also offer JAQ, allowing our customers to charge their mobile phone battery no matter how far they are from a power outlet," said Olof Istedt, VP Operations at 3 Sweden.

The new charger JAQ is small and lightweight, and due to its ease of use, myFC's new charger greatly expands the potential market as compared to all previous products. JAQ provides a simple, environmentally friendly and innovative new way to charge, where electricity is generated instantaneously when the slim, single use card is inserted into the charger. There is no need for a recharge via the power outlet.

"JAQ is the answer to what we envision. In short, the user can instantly charge his or her mobile without delay or need of recharging from the electrical grid. Anyone can charge his or her phone without the need to plug a cord into the wall. JAQ is a fuel cell charger, and therefore only has steam emission – this meets our vision to be the green alternative and to be able to create electricity without using fossil fuels," says Björn Westerholm, CEO at myFC.
