

Enviros CEO Thomas Sörensson one of the speakers at the Siemens NordX Circle

Scandinavian Enviro Systems CEO Thomas Sörensson is one of the speakers when Siemens arranges the Siemens NordX Circle, a seminar on how digital transformation can contribute to making industries both more efficient and sustainable. A number of international business leaders can be seen among the participants, including Siemens' Chief People and Sustainability Officer, Judith Wiese, who is the keynote speaker.

The NordX Circle seminar takes its point of departure in the opportunities that the digital transformation offers industrial companies in various industries. By digitalizing their entire business process, according to Siemens, industrial companies can combine the real and the digital world in a way that provides both increased efficiency and increased sustainability.

Enviro has developed a modular recycling technology that makes it possible to extract valuable raw materials from used tires. Together with Antin Infrastructure Partners, and with the support of Michelin, the company has formed the world's first large-scale tire recycling company and with the plan to establish recycling facilities in Europe by 2030 with a total annual recycling capacity of 1 million tons of end-of-life tires.

"Digitalization and automation are important components for an efficient and scalable rollout of our recycling technology and will play a major role in the implementation of our European expansion plan. As a result, digitalization also has a great importance for sustainability because increased efficiency within our operations has direct consequences for our opportunities to contribute to increased sustainability," says Thomas Sörensson, CEO Enviro.

Siemens NordX Circle takes place on September 14-15 at the Quality Hotel Friends in Solna, Sweden, and Thomas Sörensson will be on stage on the 14th. Other speakers include Håkan Agnevall, CEO of Wärtsilä, Johan Mörnstam, Head of Europe for E.ON Energy Networks, and Katarina Cornelius, Sales and Business Development Director at Stena Recycling Group.

Mangold Fondkommission AB is Enviro's Certified Adviser on Nasdaq First North Growth Market Stockholm.

Scandinavian Enviro Systems contributes to enhanced environmental and economic sustainability using a patented technology for the recovery of valuable raw materials from scrapped and end-of-life products, including tires. The production of new tires using carbon black recovered with Enviro's technology reduces carbon dioxide emissions by up to 93 per cent compared with the use of virgin carbon black. Enviro has its head office in Gothenburg and a plant for the recycling of end-of-life tires in Åsensbruk. The largest owner is the French tire manufacturer Michelin. Enviro was founded in 2001 and is listed on Nasdaq First North Growth Market.

Thomas Sörensson, CEO Enviro.
