

Telecommunication giant embeds op5 Monitor in their solution bundle

op5 has signed a contract with one of the worlds largest telecom service providers to deliver op5 Monitor to their solution bundle. The contract were based on the condition that op5 could deliver op5 Monitor on Oracle / Solaris, which is a standard architecture within the telecommunication sector. op5 Monitor meets the demanding requirements of performance that characterize this industry.

With this embedded op5 Monitor solution the telecom operators buying the solutions from the service provider can monitor their whole IT environment, gathering information in one system, with a unified view and uniform working methods.

The monitoring solution provided is simple to deploy and implement for the customer, as a part of the product and solution bundle.

The package deployment includes

- Plug-n-play Monitoring
- Data aggregation+
- Service monitoring
- Security Level Management & Passive Checks
- Persistent Statistics & Statistics Services
- SLA and QoS Reports

The long term plan is to launch op5 Monitor as a generic subset of the product and solution bundle by the telecom service provider and to be delivered for all business units, including Telecommunications and Financial Services. So far the telecom service provider have implemented op5 Monitor for over 30 telecom operators globally.
