Production shutdown in Tara due to restrictions

As of March 28, the Irish government imposed strict restrictions in the country, which has halted production in the Tara mine until further notice. The Irish restrictions are announced to last for at least 14 days. Boliden is evaluating how supply of concentrate to its own zinc smelters can be ensured despite the loss of production in Tara.

This information is information that Boliden AB is obliged to disclose in accordance with the EU Market Abuse Regulation. The information was submitted for publication through the Director Group Communications on 28 March 2020 at 13:30 CET
