Launch invitation

THE **SKIN** REVOLUTION

Skin care has never been as relevant as it is today. The trend is towards a healthy, natural look and carefully applied treatments. Your skin is your body's largest organ and its ability to produce hyaluronic acid, a natural moisturiser, is gradually reduced after the age of about 20 years.

The SQOOM concept, developed by Schick Medical GmbH in Germany, provides effective solutions for the needs of your skin, ranging from anti-aging to problem skin treatments. This revolutionary concept combines ultrasound with iontophoresis in an effective and elegant device. This combination has for some time been used in professional beauty salon treatments and thanks to SQOOM the same method is now available for use in the comfort of your home.

Please visit www.SQOOM.se to find out more about the concept with its high quality, deeply effective anti-aging gels as well as treatment creams for those with problem skin.

Welcome to our press conference and the launch of the award-winning SQOOM concept on Tuesday, 2nd September at 9:00 am at Bergendal Meetings in Sollentuna, Sweden. Helmut Schick, CEO and founder of Schick Medical GmbH, will present at the press conference. A separate press release by Schick Medical is attached.

RSVP by 25th August to info@anarmedical.se

The lovely breakfast buffet at Bergendal is available from from 7:30 am – please write +BREAKFAST in the subject field if you wish to enjoy the buffet. There will also be an opportunity to experience SQOOM treatments both before and after the press conference.
