Financial developments

Results

Operating revenue

The rental income from commercial properties amounted to NOK 344 million in the fourth quarter (NOK 361 million¹). The drop in the fourth quarter reflects a project-related decline linked to the ongoing redevelopment activities at Aker Brygge and Fornebu. Rental income for 2025 totalled NOK 1,416 million (NOK 1,386 million).

The total ongoing annual rental income (run rate) was NOK 1,460 million as of January 1. This represented an increase of NOK 27 million since October 1.

Retail and restaurant turnover for Aker Brygge and Hasle increased by 4 and 17 per cent, respectively, for 2025 compared to 2024. High turnover for new tenants is driving the large positive change at Hasle.

Operating costs

Property-related operational expenses totalled NOK 22 million (NOK 17 million) for the fourth quarter and NOK 84 million for 2025 (NOK 89 million). Other property-related expenses came to NOK 20 million (NOK 25 million) for the fourth quarter and NOK 93 million for 2025 (NOK 90 million). Administrative expenses amounted to NOK 19 million (NOK 16 million) for the fourth quarter and NOK 71 million for 2025 (NOK 68 million).

Operating profit before fair-value adjustments

Operating profit before fair-value adjustments and the results from joint ventures/associates amounted to NOK 284 million (NOK 304 million) for the fourth quarter and NOK 1,169 million for 2025 (NOK 1,140 million).

The share of the results from joint ventures and associates represented a profit of NOK 3,206 million (loss of NOK 9 million) for the fourth quarter and a profit of NOK 3,177 million for 2025 (NOK 1 million). The share of profit includes a NOK 3,195 million gain in connection with the takeover of the shares in Fabege AB in the fourth quarter.

Thereby, operating profit before fair-value adjustments amounted to NOK 3,490 million (NOK 295 million) for the fourth quarter and NOK 4,346 million for 2025 (NOK 1,141 million).

Fair-value adjustments for investment property

The valuation of the property portfolio yielded a positive unrealised fair-value adjustment of NOK 6 million (NOK 417 million) in the fourth quarter. The positive unrealised fair-value adjustment for 2025 totalled NOK 658 million (NOK 910 million). This represented a 2.3 per cent change from the value as of the beginning of the year and the cost of investments for the year. Property values have shown consistently positive development across all quarters of 2024 and 2025, rising by 5.9 per cent since the first quarter of 2024. The total market value of the property portfolio, as of December 31, 2025, amounted to NOK 28,919 million (NOK 27,925 million).

Net financial items

Net realised financial expenses amounted to NOK 176 million (NOK 191 million) for the fourth quarter and NOK 738 million for 2025 (NOK 679 million).

¹ The figures shown in brackets refer to the corresponding period of the previous year.

The fair-value adjustment for financial derivatives was negative at NOK 10 million (positive at NOK 39 million) for the fourth quarter. The negative fair-value adjustment for 2025 was NOK 40 million (positive at NOK 33 million). The changes in 2025 primarily reflect the pull-to-par effect as the derivatives approach maturity, in addition to slight movements in the market interest rates.

Profit for the period

The pre-tax profit amounted to NOK 3,309 million for the fourth quarter (NOK 561 million) and NOK 4,226 million for 2025 (NOK 1,405 million).

The reduction in the provision for deferred tax was NOK 411 million in the fourth quarter (increase of NOK 165 million) and a reduction of NOK 248 million for 2025 (increase of NOK 379 million). The reduced provision is related to the recognition of tax benefits on the balance sheet that were previously not recognised.

Net profit in the fourth quarter was thereby NOK 3,720 million (NOK 396 million) and NOK 4,473 million for 2025 (NOK 1,026 million).

Market and operations

Commercial property market

Norwegian Property estimates the office vacancy rates in Oslo to be 6.8 per cent overall, 6.0 per cent in the city centre and 7.3 per cent in Nydalen.

Moderate vacancy rates in the past few years have contributed to positive trends for rents. Office vacancy at Fornebu is 10.3 per cent. The prime yield for the Oslo CBD is estimated by various analysts to be approximately 4.50 per cent.

The bond market continued to show strong activity in property-related transactions during the fourth quarter.

On December 15, the general meeting of Norwegian Property ASA approved a share capital increase of NOK 253.5 million through the issuance of 497,064,476 new shares with a nominal value of NOK 0.51 at a subscription price of NOK 12.57 per share. The capital increase was executed as a contribution in kind, whereby the company's sole owner, Realty Holdings (NOR) Ltd, transferred its 71,973,181 shares in Fabege AB to Norwegian Property ASA in exchange for 497,064,476 shares in Norwegian Property ASA. As a result, the share capital increased by NOK 253,502,882.76 to NOK 597,377,280, and the total number of shares now stands at 1,171,328,000.

Management and the Board of Directors

In December, Haavard Rønning took on the role of Interim CEO/CFO of Norwegian Property ASA, succeeding Bent Oustad, who has taken up the position of CEO at Fabege AB. Oustad also became Chair of the Board of Norwegian Property ASA. Rønning has served as CFO of the company since

2018. Former Chair Bjørn Henningsen continues as a member of the Board.

Environmental and Social Responsibility (ESG)

Environmental responsibility

BREEAM-In-Use

In the fourth quarter, the property Lille Grensen 7 obtained a BREEAM-In-Use certification of 'Very good', leading to a total of 89 per cent of the property portfolio now being BREEAM-In-Use certified. Thirty-two per cent of the portfolio is certified 'Excellent' and the remaining 57 per cent is certified 'Very good'.

CDP-score

Norwegian Property obtained a CDP score B for climate, which is in line with the goal in the sustainability strategy. Since 2025, it is obligatory to report on forest and water security when reporting to CDP. Forest and water security are assessed as not material for Norwegian Property and the scoring was C for forest and C for water.

Sirkulator – budgeting emissions

As a measure to promote the circular economy, and to drive up the reuse of materials in renovation projects, Norwegian Property uses the tool Sirkulator. Sirkulator calculates emissions from building materials and is used as a motivation internally and in dialogue with tenants to make well-considered choices about reuse. In the fourth quarter, the tool was used in 3/11 major renovation projects as well as in one smaller renovation project.

Social responsibility

Accessible and free activities for tenants and visitors

Norwegian Property is continuing its efforts to create free and accessible activities for tenants and visitors, with a special emphasis on family friendly activities leading up to Christmas. During December, families could enjoy free Christmas plays, string orchestra concerts and other free family activities at Aker

Brygge.

VSME reporting for 2025

Due to the latest CSRD update and the scope being narrowed, Norwegian Property no longer needs to report according to the European Sustainability Reporting Standards (ESRS). Therefore, for the financial year 2025, Norwegian Property is preparing to report according to the Voluntary Sustainability Reporting Standard (VSME). The double materiality assessment, prepared as part of the preparations for the ESRS reporting in 2024, is still relevant and the outcome of the analysis will guide the ongoing work on updating the sustainability strategy.

Outlook

Norwegian Property maintains a clear strategy for growth within its core commercial property business, complemented by an ambition to explore opportunities in other property segments.

In line with this strategy, the company completed a substantial asset contribution in the fourth quarter related to a 23 per cent shareholding in Fabege. The capital increase significantly strengthened the company's financial position, reducing the net LTV ratio from 51.0 per cent to 38.5 per cent during the quarter.

Norwegian Property will continue to pursue value-enhancing initiatives through selective acquisitions and by advancing several long-term development opportunities within its existing portfolio.

Market conditions in Oslo remain characterised by a limited supply of new office properties. For new office developments to increase meaningfully, either yields must decline, construction costs must fall or rental levels must rise substantially—or a combination of these factors. The constrained supply is expected to support continued demand for high-quality office space, and rental levels are likely to remain on an upward trajectory.

Throughout 2024 and 2025, Norwegian Property's asset values have shown consistent positive development, and capital availability has improved across several funding sources. Norwegian Property benefits from a solid balance sheet, with a high equity ratio and a low loan-to-value ratio. The company's diversified tenant base—spanning both public-sector entities and a broad range of private businesses—provides resilience and stability. Combined with the strengthened capital base and ongoing strategic initiatives, Norwegian Property is well positioned to navigate potential market uncertainty while maintaining its focus on long-term growth and value creation.

| Total financial liabilities | 16,358.7 | 16,353.5 | 16,476.7 | 16,507.1 |

The estimated fair value of financial instruments is based on market prices and valuation methods. For cash and cash equivalents, fair value is assumed to be equal to the book value.

Interest-bearing receivables and liabilities are measured at the present value of future cash flows. Account is taken of the estimated difference between the current margin and market conditions (market value higher than the book value of debt in the listing indicates a negative equity effect when the applicable borrowing margin is less favourable than current market conditions).

The fair value of financial derivatives (interest-rate and currency derivatives) is the estimated present value of future cash flows which is calculated by using quoted swap curves and exchange rates as at the balance sheet date. The technical calculations are performed by the banks.

Other receivables and other current liabilities are carried principally at fair value and subsequently measured at amortised cost. However, discounting is not usually considered to have any significant effect on these types of assets and liabilities.

Financial instruments at fair value through profit or loss are specified in the table below by the valuation method.

EPRA Performance Measures

EPRA (European Public Real Estate Association) is a non-profit organisation representing the publicly listed European real estate sector. EPRA has a broad membership base, including companies, investors and service providers. Its mission is to promote and strengthen the industry through improved transparency, best practices and active engagement with stakeholders. For more information, visit www.epra.com. EPRA has issued Best Practices Recommendations to enhance reporting consistency and transparency across Europe.

Norwegian Property reports on the following EPRA Performance Measures.

EPRA Earnings

EPRA Earnings is a key measure of the underlying operating performance of the property portfolio and an indication of the extent to which current dividend payments are supported by earnings. EPRA Earnings is calculated based on the IFRS Earnings for the commercial property portfolio adjusted for changes in the market value of investment properties, changes in the market value of financial derivative instruments and the related tax effects.

| EPRA earnings | | 4Q-25 | 31.12.2025 | 4Q-24 | 31.12.2024 |
|--|--------------|-----------|------------|---------|------------|
| IFRS earnings | NOK mill. | 3,719.8 | 4,473.2 | 396.1 | 1,025.8 |
| Adjustments to calculate EPRA Earnings: | | | | | |
| Change in market value of inv. property and rental guarantee | NOK mill. | (5.8) | (658.0) | (417.3) | (909.8) |
| Change in market value of financial derivative instruments | NOK mill. | 9.7 | 39.6 | (38.9) | (33.0) |
| Share of profit from JVs and associates ¹ | NOK mill. | (3,194.7) | (3,165.8) | 23.7 | 13.5 |
| Income tax | NOK mill. | (435.7) | (340.9) | 138.4 | 293.3 |
| EPRA earnings | NOK mill. | 93.3 | 348.2 | 102.0 | 389.9 |
| Average outstanding shares | Mill. shares | 754.5 | 689.8 | 652.3 | 645.8 |
| EPRA Earnings per share | NOK | 0.12 | 0.50 | 0.16 | 0.60 |

¹ Earnings from the Nordr joint venture (JV) are adjusted for as it is related to the development of residential properties for sale, and they are not relevant for the measurement of the performance of the commercial property portfolio. The results for 2025 relating to the associated company Fabege have also been excluded from the figures. The profit include a significant income component related to a gain in relation to the takeover.

EPRA NAV Metrics

The EPRA NAV set of metrics make adjustments to the NAV per the IFRS financial statements to provide stakeholders with the most relevant information on the fair value of the assets and liabilities of a real estate investment company, under different scenarios.

EPRA Net Reinstatement Value (NRV)

The EPRA NRV metric assumes that entities never sell assets and it aims to represent the value required to rebuild the entity.

Investments in JVs are revalued based on an estimated fair value of such investments. The fair value on financial derivatives and deferred taxes on investment properties are excluded. Property transfer taxes do not normally apply to Norwegian transactions, and therefore such taxes are not included in the NRV calculation. The fair value of financial instruments, which are used for hedging purposes where the company has the intention of keeping

the hedge position until the end of the contractual duration, is excluded. Under normal circumstances, the financial derivatives that companies use to provide an economic hedge are held until maturity and so any fair value movements will not crystallise.

| EPRA Net Reinstatement Value (NRV) | | 31.12.2025 | 31.12.2024 |
|--|--------------|------------|------------|
| IFRS equity | NOK mill. | 22,002.6 | 11,598.2 |
| Revaluation of investments made in JVs and associates ¹ | NOK mill. | 2,268.1 | 1,020.5 |
| Net Asset Value (NAV) at fair value | NOK mill. | 24,270.7 | 12,618.7 |
| Deferred tax on properties and financial instruments | NOK mill. | 1,983.4 | 1,811.4 |
| Net fair value on financial derivatives | NOK mill. | (135.6) | (174.4) |
| Net Reinstatement Value (NRV) | NOK mill. | 26,118.6 | 14,255.6 |
| Outstanding shares at period end | Mill. shares | 1,165.1 | 668.0 |
| NRV per share (NOK) | NOK | 22.42 | 21.34 |

¹ The revaluation of the joint venture Nordr is based on a valuation of the company, in which projects and land bank are valued by independent appraisers. The revaluation of the associate Fabege is based on the company's most recently reported EPRA NRV figures for the third quarter of 2025.

EPRA Net Tangible Assets (NTA)

The EPRA NTA metric assumes that entities buy and sell assets, thereby crystallising certain levels of unavoidable deferred tax.

Investments in JVs are revalued based on an estimated fair value of such investments. Norwegian Property has adopted the second option in the EPRA BPR guidelines to adjust for deferred tax, estimating the real tax assets and liabilities based on how the company has previously carried out transactions and otherwise utilised existing tax positions. The fair value of financial instruments that are used for hedging purposes are excluded.

| EPRA Net Tangible Assets (NTA) | | 31.12.2025 | 31.12.2024 |
|--|--------------|------------|------------|
| IFRS equity | NOK mill. | 22,002.6 | 11,598.2 |
| Revaluation of investments made in JVs and associates ¹ | NOK mill. | 1,522.3 | 1,020.5 |
| Net Asset Value (NAV) at fair value | NOK mill. | 23,524.9 | 12,618.7 |
| Reversal deferred tax liability as per balance sheet | NOK mill. | 1,495.8 | 1,740.3 |
| Adjustment for estimated fair value of deferred tax ² | NOK mill. | 64.0 | (151.6) |
| Net fair value on financial derivatives | NOK mill. | (135.6) | (174.4) |
| Net Tangible Assets (NTA) | NOK mill. | 24,949.2 | 14,032.9 |
| Outstanding shares at period end | Mill. shares | 1,165.1 | 668.0 |
| NTA per share (NOK) | NOK | 21.41 | 21.01 |

¹ The revaluation of the joint venture Nordr is based on a valuation of the company, in which projects and land bank are valued by independent appraisers. The revaluation of the associate Fabege is based on the company's most recently reported EPRA NTA figures for the third quarter of 2025.

² Estimated fair value of deferred taxes where the estimated fair value of the tax asset related to carry-forward losses are greater than the estimated fair value of relevant tax liabilities. The calculations assume that carry-forward losses can be utilised over the next 5 years with a discount rate of 5 per cent. The real tax liability related to the gains/losses accounts is estimated on the basis of the annually depreciation rates in the Norwegian tax legislation and a discount rate of 5 per cent. The estimated fair value of the deferred tax liability related to the temporary differences of properties as of December 31, 2025 has been calculated to 3.6 per cent based on a discount rate of 5 per cent and the assumption that properties outside Aker Brygge are realised over the next 50 years period in transactions structured as sale of companies in which the tax discount is 5.5 per cent.

EPRA Net Disposal Value (NDV)

The EPRA NDV metric represents the shareholders' value under a disposal scenario, where deferred tax, financial instruments and certain other adjustments are calculated to the full extent of their liability, net of any resulting tax.

Investments in JVs are revalued based on an estimated fair value of such investments. Financial liabilities are valued at the estimated fair value, net of deferred tax.

| EPRA Net Disposal Value (NDV) | | 31.12.2025 | 31.12.2024 |
|---|--------------|------------|------------|
| IFRS equity | NOK mill. | 22,002.6 | 11,598.2 |
| Revaluation of investments made in JVs and associates ¹ | NOK mill. | 211.4 | 1,020.5 |
| Net Asset Value (NAV) at fair value | NOK mill. | 22,214.0 | 12,618.7 |
| Fair value adjustment of financial liabilities, net of tax ² | NOK mill. | 4.1 | (23.7) |
| Net Disposal Value (NDV) | NOK mill. | 22,218.0 | 12,595.0 |
| Outstanding shares at period end | Mill. shares | 1,165.1 | 668.0 |
| NDV per share (NOK) | NOK | 19.07 | 18.85 |

¹ The revaluation of the joint venture Nordr is based on a valuation of the company, in which projects and land bank are valued by independent appraisers. The revaluation of the associate Fabege is based on the company's most recently reported EPRA NDV figures for the third quarter of 2025.

² The fair value adjustment related to financial liabilities is related to the valuation as shown in note 8 to the interim financial statement, where the estimated difference between the current margins and the market conditions are taken into account as well as changes in the fair value of listed bonds. Tax is taken into account with 22 per cent.

EPRA Net Initial Yield

EPRA Net Initial Yield (NIY) and EPRA “Topped-up” NIY

The EPRA Net Initial Yield metrics presents annualised rental income based on the cash rents passing at the balance sheet date, less non-recoverable property operating expenses, divided by the market value of the property and increased with estimated purchasers' costs. The EPRA NIY is a comparable measure for portfolio valuations.

The EPRA “Topped-up” NIY metric incorporates an adjustment to the EPRA NIY in respect of the expiration of rent-free periods or other unexpired lease incentives such as discounted rent periods and step rents.

| EPRA Net Initial Yield | | 31.12.2025 | 31.12.2024 |

¹ There is no material investment property associated with the relevant joint ventures. Fabege is not included in this assessment, and the company does not report this metric.

EPRA Vacancy Rate

The EPRA Vacancy Rate is calculated based on the Estimated Market Rental Value (ERV) of vacant space divided by the ERV of the whole portfolio, and it is a per cent measure of investment property space that is vacant, based on ERV.

| EPRA Vacancy Rate | | 31.12.2025 | 31.12.2024 |
|---------------------------------------|-----------|------------|------------|
| Market rent vacant areas ¹ | NOK mill. | 134.4 | 95.3 |
| Total market rent ¹ | NOK mill. | 1,822.2 | 1,730.1 |
| EPRA vacancy rate | Per cent | 7.38 | 5.51 |

¹ Assumptions based on the external valuations for the periods relating to Norwegian Property, excluding joint ventures and associates.

EPRA Cost Ratio

The EPRA Cost Ratio is calculated based on the administrative and operating costs (including and excluding costs of direct vacancy) divided by gross rental income. It is a key measure to enable the meaningful measurement of the changes in a company's operating costs.

| EPRA Cost Ratios ¹ | | 4Q-25 | 31.12.2025 | 4Q-24 | 31.12.2024 |

| Share of joint ventures | NOK mill. | 0.3 | 1.1 | 0.1 | 0.5 |
| Total gross rental income less ground rent | NOK mill. | 344.6 | 1,417.3 | 361.3 | 1,386.9 |
| EPRA cost ratio (including direct vacancy cost) | Per cent | 18.26 | 17.67 | 16.03 | 17.87 |
| EPRA cost ratio (excluding direct vacancy cost) | Per cent | 15.75 | 14.90 | 12.85 | 15.42 |

¹ The EPRA cost ratios are calculated for Norwegian Property, excluding joint ventures and associates.

EPRA LTV

The EPRA LTV's aim is to assess the gearing of the shareholder equity within a real estate company. The EPRA LTV is calculated based on the IFRS reporting with certain defined adjustments. The adjustments include, among other things, that the EPRA LTV is calculated based on proportional consolidation. This implies that the EPRA LTV include the group's share in the net debt and net assets of joint venture and material associates. Assets are included at fair value and net debt at nominal value.
