

SMART FIX RE:CYCLED

Smart Fix Re:Cycled is a version of our ST20 panel, 60x40 post and Smart Fix using recycled materials, including steel, powder coating, and plastic component. This machine guarding system delivers the same safety performance as our standard range, but at a 70% lower CO₂e. TÜV-certified testing confirms the ability to withstand impacts of 2,100 joules.

Smart Fix Re:Cycled panels are available in 8 widths from 200 mm to 1,500 mm and heights of 2,050 mm. The mesh size of 20x100 mm allows a 120 mm safety distance from hazards and complies with international machine guarding standards.

Installing the panels with the Re:Cycled post and 150mm floor sweep will give a system height of 2200mm.

We collect, mix and re-use our powder to achieve minimal waste. Every order is therefore unique, since we never know which colours will be mixed.

FACTS

ART. NO.	COMPONENTS	HEIGHT (mm)	WIDTH (mm)	MESH SIZE (mm)	FRAME (mm)
20020503	Panel ST20 2050x200 Zero	200	20x100	19x19	20x30
