

# Facts ESS Campus

The ESS Campus, located at the research facility European Spallation Source in Lund, Sweden, consists of three buildings. It will be built by Skanska, from specifications made by ESS, and is a separate project from the construction of the research facility, initiated in 2014.

Once complete, ESS will lease the buildings from SKR Spallation, a subsidiary to Skandrenting, starting on 15 February 2021. The Campus area covers 37,900 square meters of land.

In total the buildings will have a gross floor area of 19,000 square meters, contain almost 500 workplaces, an auditorium for 200 people, a canteen and 16 laboratories/workshops.

The total construction cost is estimated to 50 M€.
