

KLARIA

Interim report

Q2 2023

1 April–30 June 2023

KLARIA PHARMA HOLDING AB (PUBL.)

Interim report April–June 2023

Net sales of 0.0 MSEK (3.7 MSEK)

Other income amounted to 0.3 MSEK (0.0 MSEK)

Second quarter of 2023

- R&D costs for the period amounted to 7.0 MSEK (14.7 MSEK)
- Profit after tax amounted to -10.1 MSEK (14.1 MSEK)
- Earnings per share for the quarter amounted to -0.09 SEK (-0.24 SEK)
- Cash flow from operating activities amounted to -2.2 MSEK (-15.7 MSEK)
- Cash and cash equivalents on the balance sheet date amounted to 8.9 MSEK (7.3 MSEK)
- Cash and cash equivalents on the balance sheet date amounted to 60.6 MSEK (57.7 MSEK)

The period January-June 2023

- Net sales of 6.5 MSEK (3.7 MSEK)
- Other income amounted to 0.3 MSEK (0.4 MSEK)
- R&D costs for the period amounted to 15.6 MSEK (31.8 MSEK)
- Profit after tax amounted to -15.5 MSEK (-34.8 MSEK)
- Earnings per share for the quarter amounted to -0.16 SEK (-0.61 SEK)
- Cash flow from operating activities amounted to -11.3 MSEK (-35.5 MSEK)

Summary of the financials

The Klaria Group TSEK (unless otherwise stated)	1 Apr-30 Jun		1 Jan-30 Jun		1 Jan-31 Dec
	2023	2022	2023	2022	2022

This Group interim report and year-end report was prepared in accordance with IAS 34 Interim Financial Reporting, the Swedish Annual Accounts Act (ÅRL) and IFRS as accepted by EU. For the parent company, the Swedish Annual Accounts Act (ÅRL) and Rådet för Finansiell Rapportering's (the Council for Financial Reporting) recommendation RFR 2 Accounting for Legal Entities was applied.

Significant events during the period

Klaria has submitted a statement to the Swedish Financial Supervisory Authority

On April 19, Klaria submitted a statement to the Swedish Financial Supervisory Authority regarding the investigation into whether the company has fulfilled its obligations under Article 17 and Article 18 of the EU's Market Abuse Regulation (MAR) in connection with the preferential issue of shares in the company that was completed on 21 December 2022.

Annual General Meeting 2023 in Klaria Pharma Holding AB (publ)

The annual general meeting was held on 12 May 2023 and decided in accordance with all proposals presented in the notice to the annual general meeting. This included the re-election of Fredrik Hübinette, Scott Boyer and Anders Jacobson as board members, and Fredrik Hübinette was re-elected as chairman of the board. More information about the resolutions passed at the annual general meeting is available on Klaria's website: www.klaria.com.

Significant events after the end of the period

No significant events have been reported after the end of the period.

Klaria's CEO Jesper Wiklund comments

The focus for Klaria in 2023 is to advance Sumatriptan Alginate film towards approval in Europe and to continue the three R&D projects where we collaborate with three separate international pharmaceutical companies. The work of bringing Sumatriptan Alginate Film successfully towards the market in Europe consists of two parts; one is the business development process to enter into a license agreement with a pharmaceutical company that will market the product in Europe, and the other is the iterative work with the regulatory authorities to take the product through to approval. During the second quarter, we made good progress in all these areas of our business.

As we mentioned in the Q1, 2023 report the market for migraine treatment is a large and growing market that is globally valued at 38 billion SEK per year. Klaria needs a commercial partner with experience to effectively market and sell our migraine treatment in such a large market. During the second quarter, we continued to work on securing a partner for Europe and we are approaching this goal.

In November 2022, we submitted our Marketing Authorization Application (MAA) for Sumatriptan Alginate Film for the treatment of migraine in the EU. The application follows a fixed, structured timetable. Our application was validated during the first quarter of 2023 and the formal start, so-called "day 0", occurred during the second quarter of this year. After the end of the Q2 period, in August 2023, we received the first questions our designated regulatory authorities, the German BfArM which is the largest regulatory authority in Europe that approves medicines. This list of questions is the so-called "day 70" questions. None of these day 70 questions were unexpected for us, which is positive. We therefore expect this approval process to proceed according to a normal time frame, which would mean an approval could be obtained in 2024.

Within research and development, we focus on our partnered R&D programs. We continue to make progress in all three of our collaborations, i.e. with Imbrium Therapeutics (Adrenaline/Epinephrine Alginate Film against allergic shock), Fluimed (Sirolimus Alginate Film against organ rejection during transplantation) and PharmaMar (currently undisclosed substance). The fact that the work in all three collaborations continued productively during the second quarter is important progress. It means that the research results were overall positive in all programs, avoiding the attrition that is otherwise normal in early-stage research.

The second quarter of the year was an intensive period with successful work in all our projects. We have a strong pipeline, with one product on its way to the market in the next year and three research collaborations in very attractive projects. During the rest of the year, we look forward to continuing the work of advancing Sumatriptan Alginate Film towards the market, and also to reaching further progress in our research projects.

Jesper Wiklund

CEO of Klaria Pharma Holding AB (publ)
Uppsala in August 2023

“Klaria’s vision is to contribute to an improved quality of life for people with serious medical conditions by utilizing the company’s unique Alginate Film technology.”

Strategy

Klaria’s strategy is to maximize shareholder value by focusing all of its development resources on projects where the current treatment fulfil two criteria: 1) the treatment is given as a nasal spray or injection due to weak or non-existing uptake in the stomach, and 2) this presents a significant problem for patients, caregivers or paying entities.

Klaria’s existing projects for epinephrine (adrenaline) against acute allergic reaction is an excellent example of projects fulfilling both criteria.

Klaria’s strategy utilizes the key feature of Alginate Films; true and full transmucosal drug delivery of pharmaceuticals with no uptake in the stomach. This differentiates Alginate Films from other oral transmucosal technologies such as starch based oral films, fast-dissolving tablets and oral sprays, where a significant portion of the active substance is mixed with saliva and swallowed, which creates a partly oral administration. In contrast to these technologies, Klaria’s Alginate Films are able to deliver pharmaceuticals which are not orally available (i.e. uptake from the stomach/intestines to the blood stream is low or non-existent). This is why Klaria has been able to for example develop fully working transmucosal films for adrenaline. None of these drugs are orally available.

With this strategy, Klaria will be able to create substantial shareholder value by developing products which delivers an improved clinical outcome while also improving the user-friendliness compared to the products available on the market today.

The methodology of combining Klaria’s patented drug delivery platform with well-known active substances brings great benefits to Klaria as a company, including shorter time to market, lower development costs and a reduced risk level compared to traditional drug development.

Business model

Our strategy is conduct to research together with paying partners in all our research. We call this a "collaborative business model" with a focus on working together with partners who pay for the development of individual projects. This strategy is important to Klaria, as we see it as the best way for a drug development company with a technology platform to conduct research and development. Of the many advantages this strategy has, these are the three most important:

1. R&D becomes a source of income instead of a source of cost because the research is paid for by the partner. This means that we do not need to raise capital from our owners to pay for the research, instead we raise this capital directly from our partners or customers.
2. The company owns parts of all projects in the form of royalty or part ownership. Our long-term goal is to own a portfolio of valuable royalty streams from approved pharmaceuticals. With this model, we can get there with a minimum of risk and capital requirements, seen from our owners’ perspective.
3. We only carry out projects where there is already strong interest from other pharmaceutical companies. It becomes a screening process at the very beginning of a project, as we must convince both researchers and commercial teams at a foreign pharmaceutical company to dedicate resources and capital to the project. This differs from the model many other biotech companies use, where they work alone for many years on a project and then try to identify a partner. This is a very risky process. The projects can fail, capital must be secured from investors and finally, even if everything goes well, it is difficult to know today what pharmaceutical companies might be interested in five or six years into the future.

Klaria's operations cont.

Klaria's drug delivery platform

Klaria's unique and patented drug delivery platform consists of an alginate-based polymer film that enables the absorption of a product's active substance through the oral mucosa. The film is similar to a stamp and is attached to the inside of the cheek or palate. Within ten minutes, the active substance is distributed directly into the blood stream.

Klaria's Alginate Films offers several clear advantages to nasal sprays and injections:

- The convenient size makes the films easy to carry around, enabling a dramatic improvement in cases such as patients with severe allergies, who currently have to bring a large injector with them.
- Patients, caregivers and families do not have to worry about injections. Needle phobia is a widespread problem, in addition to the risks of using needles including spreading of infections.
- The dosage will be more precise compared to nasal spray as the substance takes a more direct route into the bloodstream. Any risk of the patient vomiting and losing the drug dose is eliminated.

Patents

Klaria owns a patent portfolio that protects the unique Alginate technology behind the company's drug delivery platform. To further extend this protection, Klaria is continuously adding project-specific patent protection covering the combinations within each project. Up until now, the company has applied for such patent in all of its projects.

This enables Klaria to gradually build a strong patent portfolio, despite the fact that the active substances are well-known. Klaria now has approved patents for the platform covering all important markets in the world.

The company has received notice of allowance in the USA for the individual patent which protects Sumatriptan Alginate Film. The company received this positive decision in January 2021. The approval is important from two points of view. First, the patent protects Sumatriptan Alginate Film in the USA from generic copies and the price pressure it brings until 2028, which significantly increases the value of the asset. The announcement is also a strong validation of the company's patent strategy, as this is the second time the USPTO has approved a patent protecting a specific product formulated in the company's alginate film.

“The film is similar to a stamp and is attached to the inside of the cheek or palate. Within ten minutes, the active substance is distributed directly into the bloodstream.”

Pipeline for Klaria's development projects

- Collaboration based business model
- Focus where our technology solve unmet medical needs

	Pre-Clinical	Phase 1	Phase 2 / Phase 3	File for Approval	Partner

Undisclosed	Ongoing	Ongoing	Ongoing	Ongoing	
Medical Cannabis	Operations in this field are conducted in the group company CDS				

Explanation of the color coding: Completed Ongoing

Sumatriptan

Klaria's Sumatriptan Alginate Film is a novel treatment for migraine. The film achieves transmucosal delivery of Sumatriptan, giving it unique and valuable benefits compared to any other currently available treatments. This is especially true for the 80 percent of migraine patients who suffer from nausea.

In 2018, Klaria received a grant of 21 MSEK in total from the innovation focused EU Horizon 2020 program. The most recent milestone payment was received in fourth quarter of 2021.

Klaria initiated a bioequivalence registration study in the fourth quarter of 2020, and positive results were presented in May 2021. Sumatriptan Alginate Film demonstrated both bioequivalence against two EU/US approved sumatriptan nasal spray products, and a reduced the inter-subject variability.

In November 2022, the company submitted an application for marketing authorization (Marketing Authorization Application, MAA) for Sumatriptan Alginate Film for the treatment of migraine within the EU. In January 2023, the company received a positive validation of the submission. Sumatriptan Alginate film will be evaluated by the regulatory authority according to a time frame which means

that an approval can be obtained in the third quarter of 2024. This submission of the application constituted the most important event to date in Klaria's history, as the company thereby succeeded in taking all the necessary steps from the first idea of a product to completion from a development point of view.

Adrenaline/Epinephrine

Klaria's Adrenaline Alginate Film project aims to: 1. Replace EpiPen (aged incumbent technology with expensive and bulky auto-injector pen) with adrenaline/epinephrine formulated into Klaria's Alginate Film. 2. Disrupt the \$4.2 billion/year product EpiPen by offering a superior product with added value for the patient for the benefit of all patients. 3. Become the market leader. This potential makes Epinephrine Alginate Film a massive commercial opportunity for Klaria.

In March 2021, Klaria signed an option agreement with Imbrium Therapeutics for the US marketing rights of Epinephrine Alginate Film. Should Imbrium exercise its option after completion of clinical studies by Klaria, Klaria will be eligible to receive USD 66,5 million (SEK 560 million) in milestone payments as well as a double-digit royalty on the United States net sales.

Klaria's operations, cont.

Cannabis Delivery Sciences

Cannabis Delivery Sciences (CDS) is a separate entity operating within the Klaria group, with the mission to fully realize the commercial opportunities of cannabis/cannabinoids in Klaria's unique film technology. The company has signed an agreement with Pure Jamaican Limited for the commercialization of cannabinoids in Klaria's film technology, followed by sales as a part of the partner's product portfolio. More information is available on CDS's website, www.cannabisdeliverysciences.com.

Cannabis Delivery Sciences enables:

- An entirely new, patent protected category of cannabis products with a rapid and exact uptake of cannabinoids (effect after approx. 20 minutes), without the social/health related drawbacks of smoking and edibles.
- Dedicated resources with focus to sign agreements with strong entities on the cannabis market.
- Utilisation of a team with extensive marketing experience in several regions including the United States, Canada, Jamaica and the United Kingdom.

A fast-growing market worth over 30 billion USD by 2022

The total cannabis market is estimated to be worth 30 billion USD by 2020. Cannabis edibles (oils, drinks, cookies and gummies) constitute one of the segments and is expected to be worth over 4 billion USD in 2022. Absorption via edibles is however inexact, and time to effect is usually over one hour.

The smoking segment has an estimated value of over 20 billion USD, but is associated with significant health and regulatory disadvantages.

Cannabis Delivery Sciences expects that it will reach a significant market share in both these segments. Klaria's film technology is easier to use and carry, provides more accurate dosing and allows significantly shorter time to effect compared to edible products. At the same time, the technology is free of the health and regulatory disadvantages associated with smoking.

“Cannabis Delivery Sciences enables full realization of the commercial opportunities of cannabis products formulated in Klaria's unique film technology.

Second quarter, April-June

Net sales

The Group's net sales for the quarter amounted to 0 TSEK (3 659 TSEK).

Costs

Costs during the quarter amounted to 9,812 TSEK (17,105 TSEK), divided into administrative costs of 2,059 TSEK (1,862 TSEK), sales costs of 764 TSEK (555 TSEK) and research and development costs of 6,989 TSEK (14,688 TSEK).

Earnings

Profit/loss after financial items and net profit after tax was -10,110 TSEK (14,510 TSEK), or -0.09 SEK (-0.24 SEK) per share.

Cash flow and liquidity

Cash flow for the quarter amounted to -4,171 TSEK (-15,698 TSEK). Cash flow from current operations amounted to -2,165 TSEK (-15,683 TSEK), or -0.02 SEK (-0.26 SEK) per share. Klaria's liquidity at the end of the period was 8,861 TSEK (7,288 TSEK).

Investments

During the quarter, Klaria has invested 0 TSEK (42 TSEK) in tangible fixed assets.

Equity

Equity in the Klaria Group at the end of the period amounted to 60,628 TSEK (57,657 TSEK) or 0.57 SEK (0.97 SEK) per share. The equity ratio at the end of the period was 71% (57%).

The period January-June

Net sales

The Group's net sales for the period amounted to 6,528 TSEK (3 659 TSEK).

Costs

Costs during the period amounted to 20,751 TSEK (36,619 TSEK), divided into administrative costs of 3,918 TSEK (3,761 TSEK), sales costs of 1,270 TSEK (1,041 TSEK) and research and development costs of 15,563 TSEK (31,817 TSEK).

Earnings

Profit/loss after financial items and net profit after tax was -15,508 TSEK (-34,768 TSEK), or -0.16 SEK (-0.61 SEK) per share.

Cash flow and liquidity

Cash flow for the period amounted to -7,876 TSEK (-18,199 TSEK). Cash flow from current operations amounted to -11,290 TSEK (-35,497 TSEK), or -0.12 SEK (-0.59 SEK) per share.

Investments

During the quarter, Klaria has invested 0 TSEK (42 TSEK) in tangible fixed assets.

Fiscal deficits

Klaria's current operations are initially expected to generate negative earnings and fiscal deficits. There are currently not convincing enough reasons to indicate fiscal surpluses in the future that can justify capitalisation of the value of loss carry-forwards. Deferred tax assets have therefore not been reported. Sales of a candidate drug are expected to generate profits which at present are estimated to be taxdeductible from previous years' fiscal deficits, which would entail a low tax burden on the Company when a project is sold or the pharmaceutical is launched on a commercial market. The fiscal deficits for the Group companies amounted to 141,207 TSEK per December 31, 2021 and amounted to 194,573 TSEK per December 31, 2022.

Personnel

The number of employees at the end of the period was 6 (incl. CEO), of which 0 were part-time.

The parent company

The legal form of the company is a public limited liability company, regulated by the Swedish Companies' Act (2005:551). The Board's registered office is located in Stockholm. Klaria Pharma Holding AB (publ) is the parent company in a group of nine companies in total. Klaria Pharma Holding AB owns all shares in Klaria Incentive AB (556955-6573), Uppsalagruppen Medical AB (556847-3390), WBC Drug Delivery Technologies GmbH AG Munich (HRB 247378), Karessa Pharma AB (556966-7420), Karessa Incentive AB (559114-8514), Klaria AB (559012-2577), which in turn owns all shares in FFT Pharmaceutical AB (556955-6573). Furthermore, Klaria Pharma Holding AB (publ) owns 95% of CDS Functional Film AB (559222-7374).

Second quarter April-June

Net sales in the parent company during the quarter amounted to 0 TSEK (0 TSEK). Costs amounted to 3,631 TSEK (3,933 TSEK), of which administration costs amounted to 2,519 TSEK (2,488 TSEK), sales costs to 492 TSEK (341 TSEK) and research and development costs to 620 TSEK (1,104 TSEK). Profit after net financial items for the quarter was -2,951 TSEK (-3,537 TSEK).

Liquidity in the parent company per June 30, 2023 was 770 TSEK (4,557 TSEK). Equity at the end of the period amounted to 169,129 TSEK (173,259 TSEK) and the equity/assets ratio was 88% (82%).

Share capital

As of June 30, Klaria's share capital amounts to 1,775,008.73 SEK divided on 106,500,523 outstanding shares.

The share

Klaria Pharma Holding's share is listed on First North under the short name KLAR with ISIN code SE0005506193. Klaria's ICB category is Subsector 4577. FNCA Sweden AB is the company's Certified Advisor. As of June 30 2022, the number of shareholders in the company amounted to approximately 5,600.

The period January-June

Net sales in the parent company during the period amounted to 0 TSEK (0 TSEK). The costs amounted to 7,101 TSEK (8,969 TSEK), of which administration costs constituted 5,055 TSEK (5,389 TSEK), sales costs 697 TSEK (801 TSEK) and research and development costs 1,349 TSEK (2,779 TSEK). Profit after net financial items for the period was -6,129 TSEK (-8,135 TSEK).

Significant risks and uncertainties

Through its operations, Klaria is exposed to risks and uncertainties. Information about the company's risks and uncertainties can be found on pages 23-24 in the company's annual report for 2022, which is available on the company's website: www.klaria.com.

Note 1 Accounting Policies

This interim report has been prepared for the group in accordance with IAS 34 Interim Reporting and the Annual Accounts Act (ÅRL) as well as IFRS, as adopted by the EU. For the parent company, the Annual Accounts Act (ÅRL) and the Swedish Financial Reporting Council's recommendation RFR 2 Accounting for legal entities have been applied.

Apart from what is stated below, the parent company's accounting principles and basis of calculation for the report are unchanged compared to the latest annual report for the financial year ended 31 December 2022 and should be read together with it.

Note 2 Transactions with related parties

No transactions with related parties have been made during the quarter or the period.

Profit/loss per share

Net profit/loss divided by the average number of shares.

Average number of shares

The average number of shares in Klaria Pharma Holding AB (publ) has been calculated on the basis of a weighting of the historical number of issued shares in Klaria Pharma Holding AB (publ) after each completed share issue, times the number of days since the respective number of shares were issued.

Equity/assets ratio

Equity in relation to total assets.

Return on equity

Profit/loss after tax.

Return on capital employed

Profit/loss after net interest income in relation to capital employed.

Capital employed

Total assets minus interest-bearing liabilities.

Equity per share

Equity divided by the number of shares on the balance day.

Cash flow from operating activities per share

Cash flow from operating activities divided with the average number of shares.

Cash flow per share

Cash flow for the period divided with the average number of shares.

The Board of Directors and CEO hereby assure that this interim report gives a true and fair view of the company's operations, financial position and performance.
