About Crunchfish – crunchfish.com

Crunchfish is a deep fintech company developing patented governed offline payments technology for payment systems, banks, and payment applications. Its reservation-based Layer-2 architecture enables offline payments to operate as digital money, preserving central ledger authority, bounded exposure, and liquidity anchored within regulated institutions. By structurally aligning banking economics, scalable deployment, and governance continuity, Crunchfish enables offline capability at institutional scale without creating parallel forms of money or unmanaged credit risk. Crunchfish is listed on the Nasdaq First North Growth Market.
