

Crunchfish will Attend the Digital Money Summit 2026 in London

Malmö, May 19th, 2026.

Crunchfish will attend the Digital Money Summit 2026 in London, May 19-20. The Digital Money Summit is the Digital Monetary Institute's annual flagship event to discuss the future of digital money. The summit convenes the public and private sectors on the future of digital money, payments and financial markets.

Representing Crunchfish at the Digital Money Summit 2026 in London will be Joachim Samuelsson, CEO, Patrik Lindeberg, COO, and Rutger Petersson, R&D Director.

During the summit, Joachim Samuelsson will deliver a keynote presentation and a Q&A session on the topic “Reimagining offline architecture for retail payment resilience”. The keynote will highlight the importance of resilient payment infrastructure and governed offline payment solutions to ensure payment survivability during network disruptions and outages.

Crunchfish will also host a booth to engage with central bankers, regulators, technology providers, banks, payments services and digital asset provider throughout the event.

More information about the event is available at the [Event Page](#).

About Crunchfish – crunchfish.com

Crunchfish is a deep fintech company developing governed offline payments technology for payment systems, banks, and payment applications. The company enables offline payments as a Layer-2 solution on top of existing payment systems, allowing transactions to be executed without connectivity while ledger authority and settlement remain unchanged. Through a reservation-based model, resilience is achieved without creating parallel forms of money or unmanaged credit risk. Crunchfish's architecture is patented and enables interoperability across multiple payment systems and markets. The solution strengthens system stability while also supporting economic incentives by ensuring that liquidity backing offline payments remains within the regulated financial system.
