

Flexible and easy reporting for Water and Sewage Treatment

FOOD & BEVERAGES | LIFE SCIENCE | INFRASTRUCTURE | METALS | PULP & PAPER | ENERGY | MANUFACTURING | WATER | PETRO & CHEMICALS |

Calculate amounts

Simple summation of counters and flows in order to ascertain volumes, operating times or amount of energy.

Simple navigation

Reporting tree with support for report parameter favourites.

Drilldown

Click directly on the report to drill down and understand the underlying reasons.

Web-based

Retrieve and integrate reports as you please.

Built-in rectification

Click on a value in the report to rectify it. Naturally, with full traceability.

Export and distribute

Export to Excel and PDF or queue to print or file.

Standard calculations

More than 15 standard calculations from Proficy Historian, e.g. average, max. and total.

Built-in security

Single Sign On security integrated with Windows security.

Customised calculations

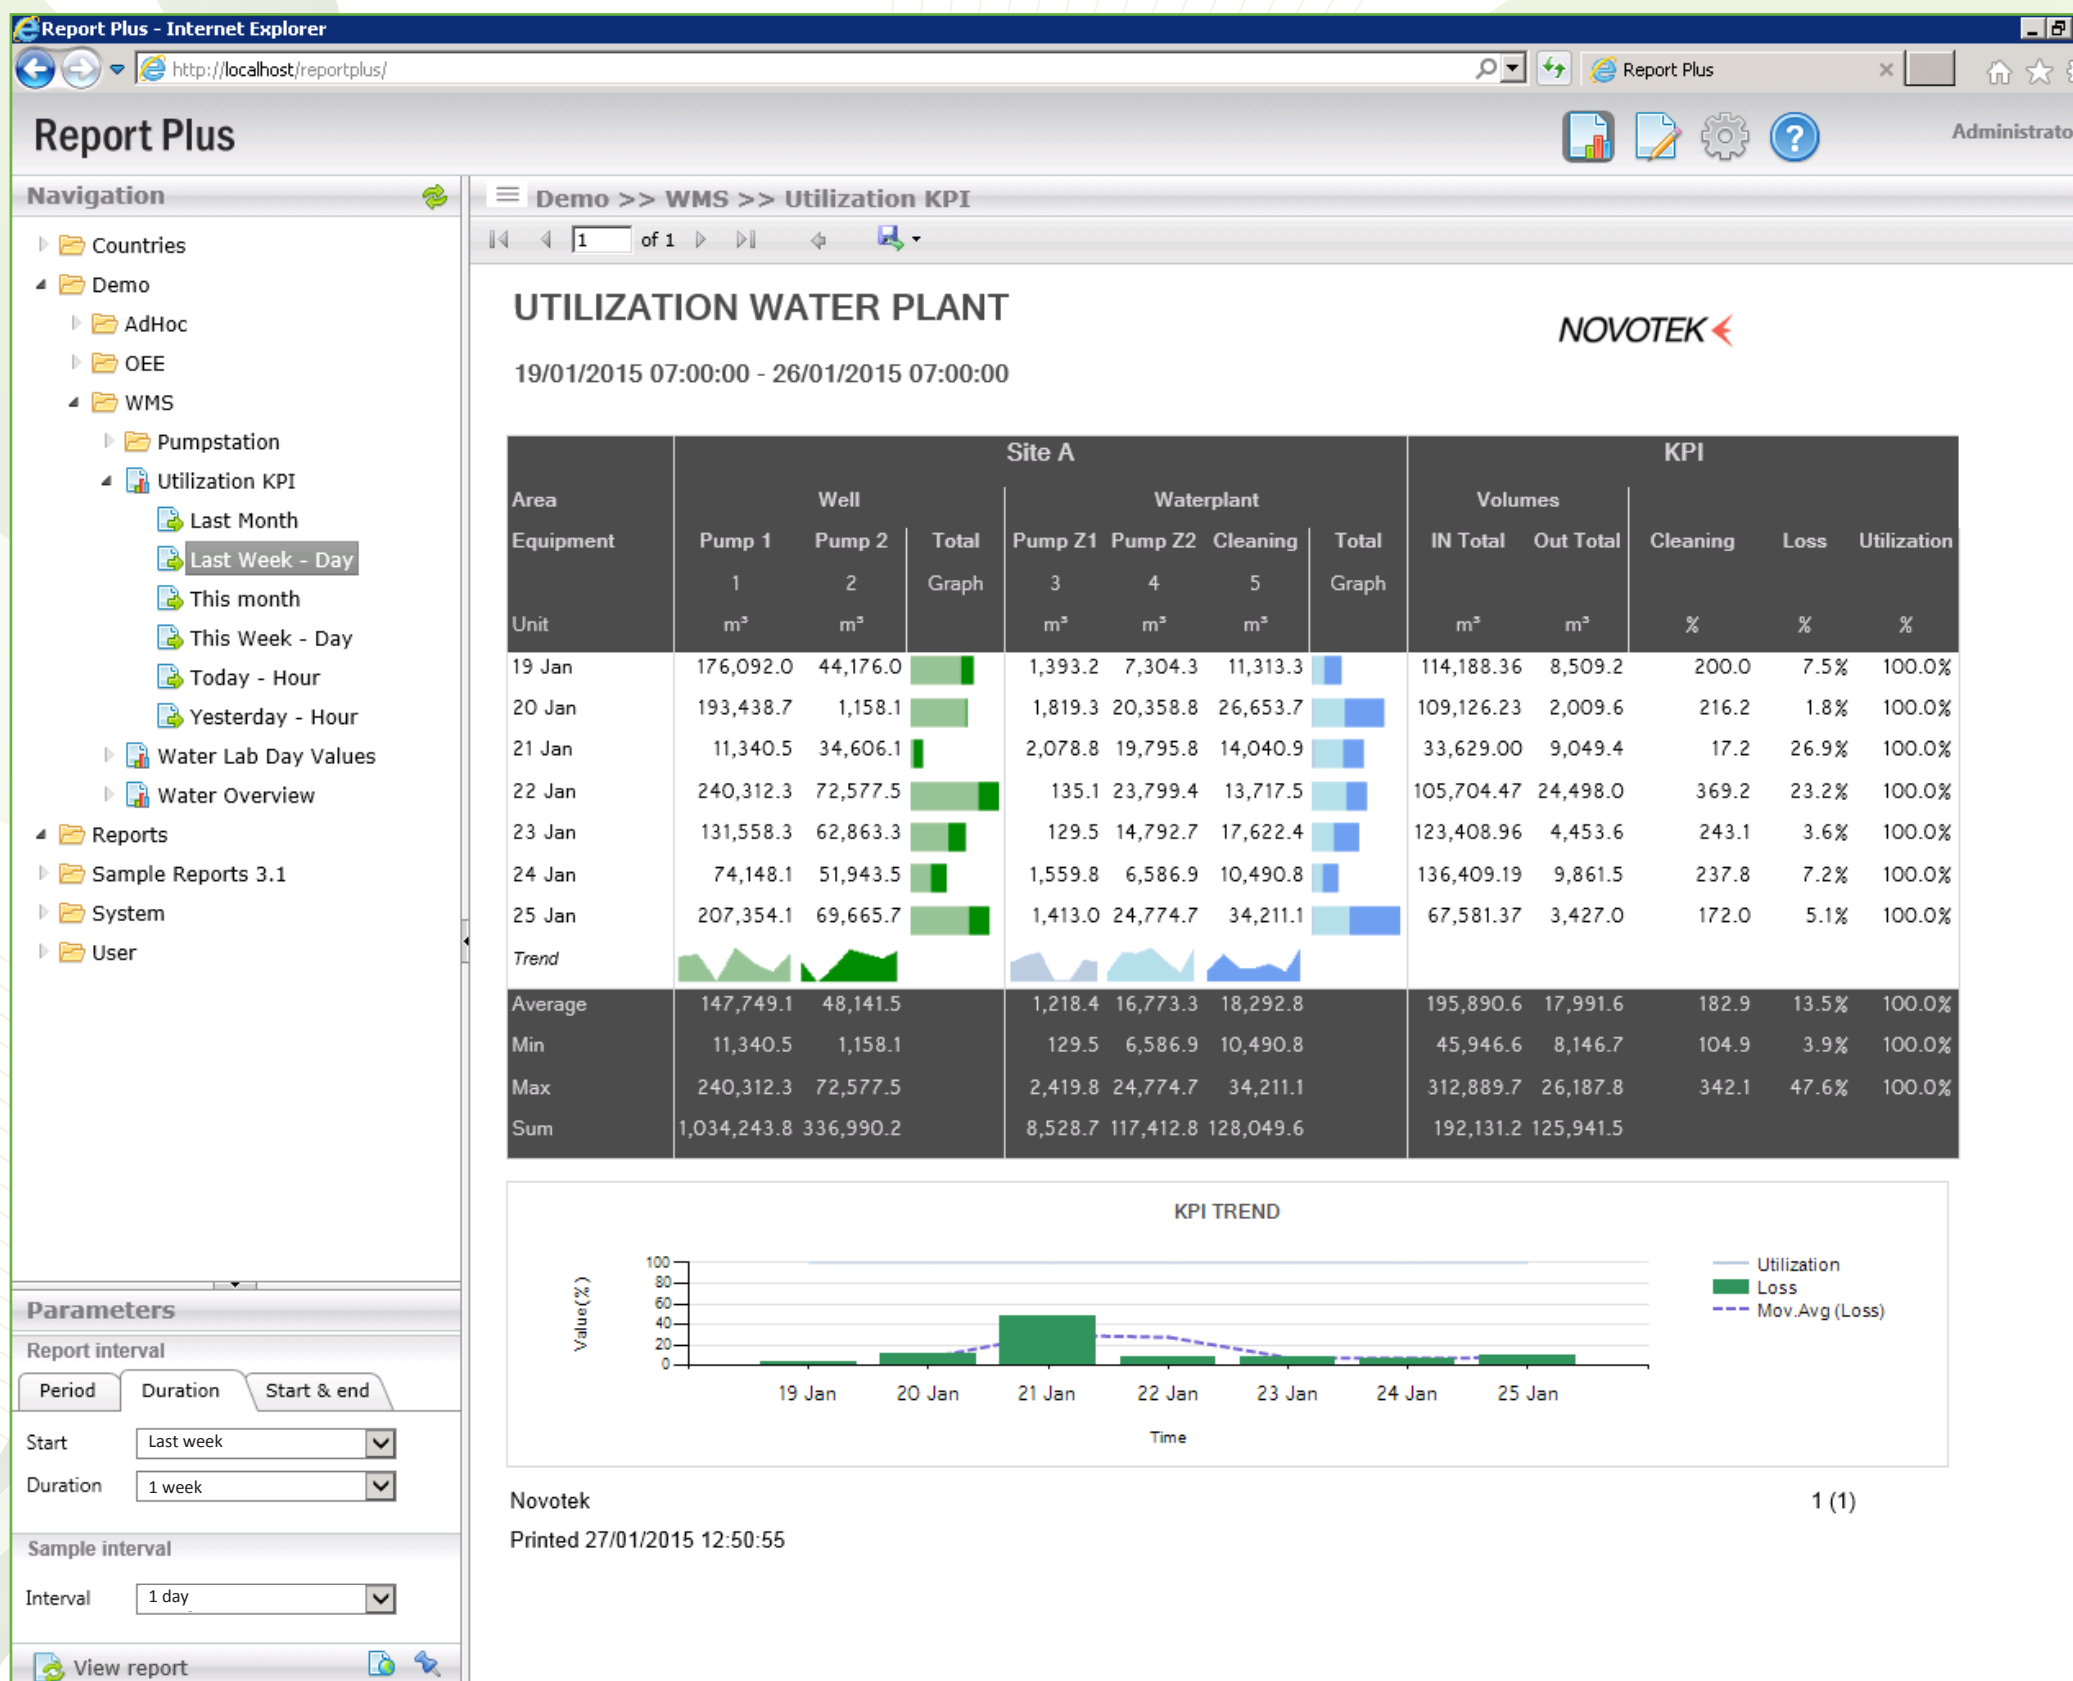

Calculate overall totals and key ratios.

Statistics

Simple reporting statistics.

Graphic presentation

More than 50 types of diagram for presentation and interactive analysis.

Flexible report generation

Click on a value in the report to rectify it. Naturally, with full traceability.

Manual input

Click on a value in the report to rectify it. Naturally, with traceability.

Customised reporting and analysis for Water and Sewage systems

The ReportPlus reporting module is a product that enables the easy monitoring of the regulations and key ratios that exist in today's water and sewage systems. This can apply to the use of chemicals, amounts produced, operating times or energy consumption.

ReportPlus is an open, standard solution that helps to solve the reporting needs for all manner of user categories:

WATER

Produced volumes, use of chemicals, amount of energy.

SEWAGE

Purified volumes, use of chemicals, amount of sludge, amount of energy.

PIPE NETWORK

Pumping stations, booster stations, overflows, rainfall reports.

LAB

Manual, automatic and external lab values combined with process data.

OPERATORS

Operating data logs, rounds reports.

BIOGAS

Production, refuelling/sales.

AUTHORITIES

Emissions reports, rainfall statistics, water quality, traceability.

The product is delivered with a large number of example reports, making it easy to get started.

ReportPlus is connected to the world-leading process database, Proficy Historian, which stores all data in a secure and quick manner 24 hours a day, 365 days a year. This data is then used as a basis for creating reports. However, it also means that you never lose resolution and you can always find out the underlying values in your reports. This is important in all forms of official reporting and pursuance.

NOVOTEK  Improving your performance

Novotek AB | Högdrodergatan 9, 212 39 Malmö | Phone +46 (0)40 31 69 00 | info@novotek.com | www.novotek.com

Novotek is a complete supplier with many years of experience within automation for water and sewage treatment works. We can offer products for everything from the controlling of individual pumping stations to the complete monitoring, management and data collection for the entire business. In addition to that, we can offer maintenance systems and alarm management systems.

The standard products we offer are based on the latest standard within IT and automation. They have open interfaces, downwards to existing equipment and upwards to higher level systems. This makes the solutions easy to get started with, but also future-proof in a changing world.
