Agenda

- Summary of January–September 2025
- Financial development
- Outlook and financial targets

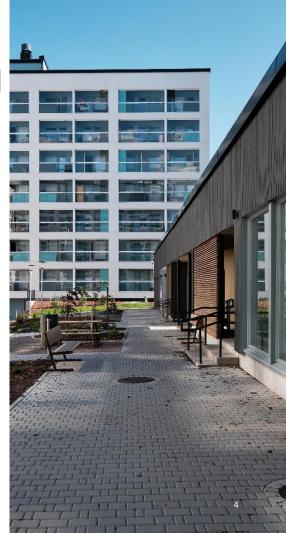

Summary of January— September 2025

Occupancy rate improved, total revenue and net rental income increased

- Total revenue and net rental income grew
- FFO decreased due to higher financial and repair expenses compared to the previous year
- Our balance sheet is strong, and there were no significant changes in the fair values of investment properties
- Renting continued at a good level in early autumn. The occupancy rate for the third quarter rose to 96.1 per cent, up from 94.4 per cent in the second quarter
- The biggest cities are at different stages in terms of the market balancing
- In connection with the portfolio sale, we repaid loans by EUR 200 million, and we launched a share buyback programme in late August
- In September, Moody's affirmed Kojamo's Baa2 credit rating and upgraded the outlook to stable
- In the autumn, we initiated work on updating our strategy

Operating environment

General operating environment

- The outlook for the global economy is cautiously optimistic. The uncertainty and tariffs continue to weaken the growth of global economy
- The euro area economy is recovering, supported by slowing inflation and substantial investments
- The Finnish economy is growing slowly, but private consumption is holding back the economic recovery
- The unemployment has continued to increase faster than anticipated, but the employment situation is expected to improve next year as production increases
- In the euro area, the interest rate cut cycle is considered to have ended, whereas in the United States, Fed is expected to continue cutting rates

Operating environment

Housing production

- Residential start-ups are projected to remain at the previous year's low level and to increase next year
- There is still oversupply in the housing market, but the number of completed apartments has already dropped. As the peak years' production has been absorbed by the market, housing production especially in the capital region is at an insufficient level given the strong population growth

Rental market situation

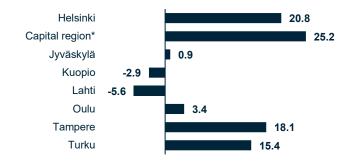

- Urbanisation and decreasing average household size support the long-term demand
- Population growth will continue in the largest cities, driven by increased immigration and internal migration
- The growth will be concentrated mainly in the capital region, Tampere, and Turku

Immigration and its impact

- Net immigration to Finland has tripled over the past five years. Net immigration in 2024 declined slightly from the previous year to around 47,000, but in longer-term comparison, it continues on a growth trajectory
- In 2023, a large number of immigrants arrived in Finland from Europe, particularly from Ukraine. This trend has clearly slowed down but remains at a higher level than before
- Immigration from Asia has increased since 2020, and it accounts for about half of Finland's net immigration. The main countries of origin are the Philippines, Nepal, Sri Lanka, India and Bangladesh

Outlook for Kojamo in 2025

Kojamo estimates that in 2025, the Group's total revenue will increase by 0–2 per cent year-on-year. In addition, Kojamo estimates that the Group's FFO for 2025 will amount to between EUR 135–141 million, excluding non-recurring costs.

The outlook is based on the management's assessment of total revenue, property maintenance expenses and repairs, administrative expenses, financial expenses and taxes to be paid as well as the management's view on future developments in the operating environment.

The outlook takes into account the estimated occupancy rate and development of rents. The total revenue and FFO outlook also takes into account the impacts of the disposal of 44 residential properties, but it does not take into account the impact of potential future acquisitions or disposals. The outlook does not take into account the taxes resulting from the transaction.

The management can influence total revenue and FFO through the company's business operations. In contrast, the management has no influence over market trends, the regulatory environment or the competitive landscape.

Strategic targets

• This autumn, we initiated a strategy review that focuses on updating our existing strategy

Topical with our sustainability work

- Due to the Omnibus proposal, we will no longer be subject to sustainability and taxonomy reporting requirements. Due to the enactment of the Stop-the-clock directive, we will not report the 2025 data in accordance with CSRD. Kojamo's goal is to continue to closely align our sustainability objectives with the key goals of our business. The easing of the structured reporting obligation allows us to continue developing our reporting in line with business needs and investor expectations
- We have made an agreement on demand response for district heating and smart heating optimisation in more than 40 Lumo buildings in Jyväskylä. With smart control, the indoor temperature remains more even, which increases the comfort of living and reduces energy consumption
- We are installing a geothermal heating system and heat recovery in two Lumo buildings.
 The geothermal heating and heat recovery improve the energy efficiency of the property
 and reduce its heating costs. The first project is already underway and will be completed
 during autumn 2025
- Kojamo received recognition in the Europe's Climate Leaders ranking, compiled by the Financial Times and Statista
- EPRA has awarded Kojamo the highest possible gold recognitions for its 2024 Financial Statements and Sustainability Report
