

News release from Vestas Mediterranean

Madrid, 31 December 2019

Vestas secures 30 MW order in Mexico

Vestas has received a 30 MW order for a project in Mexico. The contract includes the supply and installation of 15 V120-2.0 MW wind turbines as well as an Active Output Management 5000 (AOM 5000) service agreement for the operation and maintenance of the wind park over the next 20 years.

“This order exemplifies the reliability of Vestas’ portfolio and our ability to ensure optimised performance for the lifetime of the project”, says Agustín Sánchez-Tembleque, General Manager of Vestas México.

Turbine delivery is expected by the fourth quarter of 2020 whilst commissioning is planned by the second quarter of 2021.

Vestas pioneered the Mexican wind energy market in 1994, when it erected the country’s first commercial wind turbine. Since then, Vestas has accumulated over 2.3 GW of installed capacity or under construction in Mexico.

The project and customer are undisclosed.

About Vestas

Vestas is the energy industry’s global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with more than 108 GW of wind turbines in 80 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled 91 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas’ more than 25,000 employees are bringing the world sustainable energy solutions to power a bright future.
