

News release from Vestas China

Beijing, 30 June

Vestas wins V155-3.3 MW order with long-term service contract in China

Vestas has received a 40 MW order for a distributed wind project in China that includes the supply of 12 V155-3.3 MW wind turbines, as well as a 20-year Active Output Management 4000 (AOM 4000) service agreement.

The contract brings Vestas' order intake for V155-3.3 MW turbines above 300 MW in China, since winning the first order less than four months ago. The strong demand for the turbine variant demonstrates its ability to operate with high efficiency amidst the low wind conditions that are characteristic of the world's largest wind energy market. The turbine combines low sound power levels with a full-scale converter, making it highly suitable for China's growing number of distributed wind energy projects. Distributed wind refers to the fragmented network of power grids across China, whereby smaller scale, local power grids are connected to densely populated areas.

"The V155-3.3 MW turbine, in combination with a long-term service agreement proves to be a strong solution for distributed wind projects in China, as it boosts energy production while improving the performance certainty over a wind park's lifecycle. This amounts to a competitive business case for our customer", Says Thomas Keller, the President of Vestas China.

Deliveries are expected to begin in the fourth quarter of 2020, with commissioning planned for the same quarter.

The project and customer names are undisclosed.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with more than 115 GW of wind turbines in 81 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 98 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 25,500 employees are bringing the world sustainable energy solutions to power a bright future.
