

## News release from Vestas Asia Pacific

Singapore, 26 November 2020

### Vestas wins 328 MW order for two wind projects in Australia

In partnership with Global Power Generation, a subsidiary of the multinational power company Naturgy Group, Vestas has secured a 328 MW deal for two wind projects in Victoria, Australia. The order includes supply and installation of 52 V136-4.2 MW wind turbines for the Ryan Corner Wind Farm as well as the engineering, procurement and construction of 26 V136-4.2 MW wind turbines for the second stage of Berrybank Wind Farm.

Both projects mark an important step towards building smarter, more liveable and emissions-free cities. In addition to this, the second stage of Berrybank Wind Farm is one of the successful projects under the Australian Capital Territory's 2019-20 renewable energy auction and will be Vestas' fifth Australian project to be initiated through a government renewable energy auction scheme.

Upon completion, Vestas will commence a 15-year Active Output Management 5000 (AOM 5000) service agreement for both projects. With an energy-based availability guarantee, the service agreements will maximise energy production and provide Global Power Generation with long-term business case certainty.

*"We are proud that customers from all around the world turn to Vestas for our leading technology, market experience, broad service solutions and ultimately, the best return on investment for their wind project",* said Clive Turton, President of Vestas Asia Pacific. *"Global Power Generation is a valued customer to Vestas globally and we look forward to building upon our existing partnership".*

*"As a successful previous partner of the Australian Capital Territory's renewable energy auction, Vestas is pleased to deliver stage two of Berrybank Wind Farm and support the ACT's vision for a sustainable future",* said Peter Cowling, Head of Vestas Australia and New Zealand. *"Vestas is the largest installer and maintainer of wind generators in Australia. Our 327 MW partnership with Global Power Generation reinforces our commitment to Australia's clean energy transition".*

*"Global Power Generation is pleased to continue its partnership with Vestas as OEM of choice, and long-term maintenance service provider for Ryan Corner and Berrybank wind farms stage one and two",* said Pedro Serrano, Chief Business Development Officer, Global Power Generation.

The two projects are set to provide clean energy to approximately 120,000 homes. In addition, the projects will create almost 500 jobs during their construction.

Delivery of the turbines for both projects is expected to occur in the third quarter of 2021, with commissioning scheduled for the third quarter of 2022.

### About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with more than 122 GW of wind turbines in 82 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 108 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 25,500 employees are bringing the world sustainable energy solutions to power a bright future.

### About Global Power Generation (Naturgy Group)

Global Power Generation (GPG) is the Naturgy Energy Group's subsidiary dedicated to international power generation, which is 25% owned by the Kuwait Investment Authority (KIA), the oldest sovereign fund in the world. KIA's interest in GPG is managed by the KIA's direct infrastructure platform, Wren House Infrastructure Management. GPG manages a total installed capacity of 4,100 MW and employs around 800 people worldwide. We are backed by a great variety of projects that we have developed in different countries around the world and our best resource is the experience and know-how of our team. We bring an owner-orientated approach to each of our projects and primarily focus on long-term projects. We are a company dedicated to the environment, health, safety and the community.
