Madrid, 31 December 2020

# Vestas wins 46 MW order in Spain

Vestas has secured a 46 MW order for a wind park in Spain. The order includes the supply and installation of eleven V136-4.2 MW wind turbines.

Once installed, this project will be added to the more than 4.7 GW that Vestas has installed in Spain since 1991, when the company erected its first wind turbine in the country.

*"This wind project showcases the competitiveness of our 4 MW platform and the capability of the Vestas' technology to meet the most demanding requirements of the Spanish grid code. We provide the business case certainty and the reliability our customers need to develop new wind projects in the country",* says Javier Ojanguren, Senior Director Sales and Country Manager, Vestas Spain.

Turbine delivery is expected by the second half of 2021 whilst commissioning is planned by the first half of 2022.

The project and customer are undisclosed.
