

## News release from Vestas Mediterranean

Madrid, 31 December 2020

### Vestas wins first EnVentus order in Latin America for a 504 MW project in Colombia

With reference to company announcement no. 47/2020 of 31 December 2020, Vestas has received a 504 MW order for an undisclosed project in Colombia. The contract includes the supply and installation of 90 V162-5.6 MW EnVentus wind turbines, as well as a 15-year Active Output Management 5000 (AOM 5000) service agreement.

This will be the first project to feature turbines from the EnVentus platform in Latin America and it takes the global order intake for the platform past 2 GW. With a swept area of over 20,000m<sup>2</sup>, the V162-5.6 MW applies the largest rotor size in the Vestas portfolio to achieve industry-leading energy production paired with a high capacity factor.

*“The EnVentus platform establishes a new benchmark in competitiveness, and we expect it to make a huge contribution to the energy transition both in Colombia and in Latin America over the coming years”,* says Vestas Vice President for LATAM North, Agustín Sánchez Tembleque.

This is the second order received by Vestas in Colombia in the last six months. With more than 12 GW installed or under construction in Latin America, Vestas plays a key role in supporting the continent’s transition towards a more sustainable energy mix.

Turbine delivery and commissioning are undisclosed as per customer request.

#### About Vestas

Vestas is the energy industry’s global partner on sustainable energy solutions. We design, manufacture, install, and service wind turbines across the globe, and with more than 122 GW of wind turbines in 82 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 108 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas’ more than 25,500 employees are bringing the world sustainable energy solutions to power a bright future.
